QUESTION 1

You have configured your IVE device to use OCSP for certificate validation. Which statement is true?

A. The IVE device will validate certificates with the OCSP server on an on-demand basis.

B. The IVE device will download the CRL from the OCSP server.

C. The IVE device will periodically check user certificates with the OCSP server.

D. The IVE device will use OCSP to download and validate the CA certificate.

Correct Answer: A

QUESTION 2

Which three statements about role mapping are true? (Choose three.)

A. Role mapping can be based on a user attribute value.

B. Role mapping can be configured first, before creating the actual roles.

C. Role mapping can be based on VLAN assignment.

D. Role mapping can be based on a certificate and its data.

E. Role mapping can be based on custom expressions.

Correct Answer: ADE

QUESTION 3

Which two statements about certificate-based user authentication are true? (Choose two.)

A. Certificate-based user authentication may not require user input during the authentication exchange.

B. Certificate attributes can be used to determine the correct sign-in page.

C. Certificate attributes can be used to assign users to roles.

D. Certificate-based user authentication requires the use of OCSP.

Correct Answer: AC

QUESTION 4

Which series of steps describes the appropriate method for upgrading an active/active cluster?

A. 1) upgrade individual nodes; 2) reboot nodes; 3) enable nodes

B. 1) disable nodes; 2) upgrade one device; 3) enable nodes

C. 1) upgrade master; 2) reboot backup; 3) join backup again

D. 1) disable nodes; 2) upgrade individual devices; 3) enable nodes

Correct Answer: D

QUESTION 5

You have configured Cache Cleaner to clear the directory C:\apps\CustomApp when a user logs out of the IVE. The user has manually saved the file MyCustomApp.txt to the directory.

What happens when Cache Cleaner attempts to clear the directory?

A. Cache Cleaner detects the presence of a user-created file and displays an error message on the user system.

B. Cache Cleaner detects the presence of a user-created file and posts an error message to the IVE log.

C. Cache Cleaner deletes all files except MyCustomApp.txt.

D. Cache Cleaner deletes all the files in the directory, including the file saved by the user.

Correct Answer: D
