- D. IKE

Correct Answer: D

QUESTION 5

Click the Exhibit button.

You have been asked to block YouTube video streaming for internal users. You have implemented the configuration shown in the exhibit, however users are still able to stream videos.

What must be modified to correct the problem?

Exhibit:

```
user@srx# show
application-firewall {
  rule-sets employee-productivity {
    rule block-youtube-videos {
      match {
        dynamic-application junos:YOUTUBE-STREAM;
      }
      then {
        deny;
      }
    }
    default-rule {
      permit;
    }
  }
}
policies {
  from-zone office to-zone Internet {
    policy application-services-office {
      match {
        source-address any;
        destination-address any;
        application [ junos-ftp junos-http junos-smtp junos-pop3 junos-imap ];
      }
      then {
        permit;
      }
    }
  }
}
...
```

- A. The application firewall rule needs to be applied to an IDP policy.
- B. You must create a custom application to block YouTube streaming.
- C. The application firewall rule needs to be applied to the security policy.
- D. You must apply the dynamic application to the security policy

Correct Answer: C
