QUESTION 1

Which three statements are correct about ARP related troubleshooting? (Choose three.)

- A. Most devices that run the Junos OS allow you to specify a manual ARP entry.
- B. The monitor traffic interface command can be used to watch ARP packets.
- C. There are no default ARP policers on any devices running the Junos OS.
- D. An individual ARP entry can be cleared using the clear arp hostname command.
- E. The clear arp command also clears the IPv6 neighbor cache.

Correct Answer: ABD

QUESTION 2

Click the Exhibit button.

```

Exhibit -
```

Referring to the exhibit, which two OSPF adjacency problems are present? (Choose two.)

- A. hello interval mismatch
- B. duplicate router ID
- C. area type mismatch
- D. area number mismatch

Correct Answer: BD

QUESTION 3

Click the Exhibit button.

-- Exhibit -user@router> show system users 9:28PM up 2 days, 3:02, 2 users, load averages: 0.06, 0.13, 0.09 USER TTY FROM LOGIN@ IDLE WHAT lab u0 - 9:13PM - -cli (cli) admin p0 10.210.15.30 9:45PM - -cli (cli) -- Exhibit -Referring to the exhibit, which two statements are true? (Choose two.)

- A. The admin user is connected through a console session.
- B. The admin user is connected through a Telnet or SSH session.
- C. Both user sessions will be cleared after issuing the command request system logout terminal.
- D. The lab user's session will be cleared after issuing the command request system logout user lab.

Correct Answer: BD

QUESTION 4

Two neighboring routers running OSPF were configured with the same router ID by mistake. Which OSPF operational mode command would report the number of hello packets received with the local router's router ID?

- A. show ospf route
- B. show ospf log
- C. show ospf statistics
- D. show ospf io-statistics

Correct Answer: C

QUESTION 5

In the Junos OS, which type of file dumps the program's environment in the form of memory pointers, instructions, and register data to a file in the event of a panic or other serious malfunction?

- A. log file
- B. backup file
- C. configuration file
- D. core file

Correct Answer: D

Junos will under a panic create a core-dump file, definitely not a backup file. > show system core-dumps /var/crash/*core*: No such file or directory /var/tmp/*core*: No such file or directory /var/tmp/pics/*core*: No such file or directory /var/crash/kernel.*: No such file or directory /tftpboot/corefiles/*core*: No such file or directory
