A customer reports that BGP graceful restart is not working on R1. After a Routing Engine failover, R1 did not set the restart state bit in its Open message. The customer provides the BGP neighbor output shown in the exhibit.

Referring the exhibit, what is causing this problem?

- A. BGP graceful restart is not enabled on R1.
- B. BGP graceful restart is not enabled on the peer device.
- C. The restart duration time is not configured on R1.
- D. The restart duration time is not configured on the peer device.

Correct Answer: A

You have been asked to troubleshoot a problem where a user is not able to send traffic through your switch. While troubleshooting, you see the log messages shown in the exhibit.

What is causing the problem?

- A. The eswd process has been corrupted.
- B. The receiver MAC in the packets is undefined.
- C. The defined MAC address is misconfigured.
- D. The static IP address is misconfigured.

Correct Answer: C

### QUESTION 3

You are troubleshooting a problem where an OSPF adjacency between two neighboring routers will not form.

What are two reasons for this problem? (Choose two.)

- A. One or both of the connected interfaces are missing the family inet statement.
- B. One or both of the connected interfaces are missing the family iso statement.
- C. The connected interfaces are not on the same subnet.
- D. Another IGP is running on one or both of the routers, overriding OSPF.

Correct Answer: BD

#### QUESTION 4

Referring to the exhibit, an administrator is trying to advertise a direct route to its neighbor. The route is not advertised. What is causing this behavior?

```
user@router> show route protocol direct table inet.0
...
204.56.78.0/24  *[Direct/0] 1w0d 15:58:07
                 > via ge-0/0/1.0

user@router> show configuration policy-options policy-statement advertiseall
term 1 {
  from {
    route-filter 204.56.78.0/24 longer;
  }
  then accept;
}

user@router> show route advertising-protocol bgp 204.56.78.3

user@router>
```

- A. The policy needs the orlonger match.
- B. The policy needs to match on protocol direct
- C. The policy needs to have the accept action inside the term.
- D. The policy needs to add a seed metric into BGP.

Correct Answer: A

#### QUESTION 5

You add a multicast source to a network. The source's DR sends register messages to the RP. However, multicast clients are not able to receive traffic from the source. What are two causes of this problem? (Choose two.)

- A. A reject policy is configured on the designated router.
- B. The RP did not receive a PIM join message for the group specified.
- C. A reject policy is configured on the RP.
- D. The designated router must send a null register message to the RP.

Correct Answer: BC
