QUESTION 1

You created a header-new.phtml from the original header.phtml. How can you force Magento to use that new file in place of the native header block template?

```
A.  <reference block="header">
        <action method="setTemplate">
            <file>path/to/header-new.phtml</file>
        </action>
    </reference>

B.  <parent name="header">
        <action method="setTemplate">
            <file>path/to/header-new.phtml</file>
        </action>
    </parent>

C.  <reference name="header">
        <action method="setTemplate">
            <file>path/to/header-new.phtml</file>
        </action>
    </reference>

D.  <action method="setTemplate" parent="header">
        <file>path/to/header-new.phtml</file>
    </action>

E.  <reference name="header">
        <action method="setTemplate">path/to/header-new.phtml</action>
    </reference>
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: C

QUESTION 2

Which one of these code samples will assign a root template to a specific page of native Magento?

```
○ A.  <default>
          <reference name="catalog_product_view">
             <action method="setTemplate">
                <template>page/3columns.phtml"</template></action>
          </reference>
       </default>

○ B.  <cms_index_index>
          <reference name="default">
             <action method="setTemplate">
                <template>page/3columns.phtml"</template></action>
          </reference>
       </cms_index_index>

○ C.  <customer_account_login>
          <reference name="template">
             <action method="setTemplate">
                <template>page/3columns.phtml"</template></action>
          </reference>
       </customer_account_login>

○ D.  <catalog_product_view>
          <reference name="root">
             <action method="setTemplate">
                <template>page/3columns.phtml"</template></action>
          </reference>
       </catalog_product_view>
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: D
