### QUESTION 1

Your company has several warehouses assigned to different sites in Microsoft Dynamics AX 2009. One production line will be shut down and its associated warehouse will be used for production from another site.

How can you assign the warehouse to a different site in Microsoft Dynamics AX 2009? Choose the 3 that apply.

- A. Create a new warehouse assigned to the new site and begin using the new warehouse to store items.
- B. Create a new warehouse assigned to the new site and transfer items from the existing warehouse.
- C. Create a new warehouse assigned to the new site and delete the old existing warehouse.
- D. Change the warehouse assignment from one site to another.

Correct Answer: ABC

---

### QUESTION 2

What describes the difference between Master planning and Forecast planning in Microsoft Dynamics AX 2009?

- A. The Master planning module only works with Master planning and will support Forecast planning in a later release.
- B. Master planning is an integral part of the Accounts receivable and Accounts payable modules, while Forecast planning is integrated with the Production module.
- C. Master planning is usually a short-term plan, referred to as net requirement. Forecast planning is typically a long term plan based on estimates.
- D. Master planning is used for Operation scheduling and Forecast planning is used for Job scheduling.

Correct Answer: C

---

### QUESTION 3

A company can use scheduling strategy that uses one master plan or multiple master plans.

When should a company use a strategy with one master plan?

- A. When the company wants to make sales order simulations.
- B. When the company wants to calculate exact delivery dates.
- C. When it is not important that sales people can confirm delivery dates to customers.
- D. When orders resulting from order simulations are not firmed right away.

Correct Answer: C

---

#### QUESTION 4

One of your company's work centers is going to be used for two hours in each eight-hour shift for training. Your company uses operations scheduling. What adjustment must you make for this work center so only six hours of production work are planned for this work center shift?

- A. Set the efficiency percentage to 25.
- B. Set the operations scheduling percentage to 75.
- C. Set the capacity to six.
- D. Set the run time to six.

Correct Answer: B

---

#### QUESTION 5

A production order goes through a series of updating jobs, step by step. The stage or states of a production is called the Production order status.

Which of the following Production order status statements is true?

- A. The names assigned to the states are in alphabetical order to make it easier to recall the correct sequence.
- B. An authorized user can update the production order status from Created to Report as finished, skipping all of the updating jobs in between.
- C. When a Scheduled production orders BOM is modified, the production order is already cost estimated, so there is no way you can update the estimated cost.
- D. Prior to a production order being Ended, you can reset the production order status to a previous status in the cycle.

Correct Answer: D
