QUESTION 1

Which of the following statements about basic integration ports used by Microsoft Dynamics AX 2012 is true?

- A. Basic integration ports can host services either on the Application Object Server (AOS) or on IIS.
- B. Basic integration ports allow the user the ability to specify advanced security and troubleshooting settings.
- C. Basic integration ports support a variety of protocols through Windows Communication Foundation (WCF) adapters.
- D. Basic integration ports are exposed at a specific Windows Communication Foundation (WCF) endpoint on the Application Object Server (AOS) host.

Correct Answer: D

QUESTION 2

When integrating the Microsoft SQL Server Reporting Services reports in Microsoft Dynamics AX 2012 with the Microsoft Dynamics AX 2012 batch framework, which of the following actions can be performed? (Choose all that apply.)

- A. Schedule a report to be printed on a recurring basis.
- B. Schedule a report to be printed during off-peak hours.
- C. Automate the report batch tasks that run on the Microsoft Dynamics AX 2012 client by using the Set up batch processing form.
- D. Automate the report batch tasks that run on the Microsoft Dynamics AX 2012 batch server by using the Set up batch processing form.

Correct Answer: AB

QUESTION 3

Which Microsoft Dynamics AX 2012 tool should you use to troubleshoot performance issues?

- A. Debugger
- B. Development Workspace Tools
- C. Management Utilities
- D. Trace Parser

Correct Answer: D

QUESTION 4

Which of the following statements about record-level security in Microsoft Dynamics AX 2012 is true?

- A. Record-level security cannot be used to limit access to data based on a query.
- B. Record-level security enables administrators to restrict the data that displays on forms.
- C. Record-level security enables administrators to restrict the data that displays on menus.
- D. Record-level security does not enable administrators to restrict the data that displays in reports.

Correct Answer: B

QUESTION 5

You need to install Microsoft Dynamics AX 2012 on a mix of 32-bit and 64-bit client computers.

What should you do?

- A. Create a single configuration file in a shared directory on any available server, and specify the configuration file for each client.
- B. Create a separate configuration file for each operating system in a shared directory on the Application Object Server (AOS), and specify the appropriate configuration file for each client computer.
- C. Create a separate configuration file for each operating system in the bin directory in the Microsoft Dynamics AX DVD shared folder, and specify the appropriate configuration file for each client computer.
- D. Create a separate configuration file for each operating system at the same level as the Setup.exe file in the Microsoft Dynamics AX DVD shared folder, and specify the appropriate configuration file for each client computer.

Correct Answer: C
