QUESTION 1

A company prepares to run Microsoft Dynamics NAV by using the Web client.

You need to install the prerequisite software.

Which software should you install?

- A. Microsoft Outlook 2010
- B. Microsoft Report Viewer 2010
- C. Microsoft Internet Information Server (IIS)
- D. Microsoft .NET Framework 4.0

Correct Answer: C

QUESTION 2

What are two benefits of running a dedicated NAS Server instance for each service application? (Each correct answer presents a complete solution. Choose two.)

- A. Secured applications
- B. Better performance
- C. Automated load balancing
- D. Efficient error tracking

Correct Answer: BD

QUESTION 3

You are installing the Microsoft Dynamics NAV client software on a new computer.

You need to install the Windows client, the Microsoft Dynamics NAV Development Environment, and the Microsoft Dynamics NAV Server Administration tool without changing the default installation options.

Which installation option should you use?

- A. Client
- B. Custom
- C. Server
- D. Developer

Correct Answer: D

QUESTION 4

For which task can the NAV Server Administration tool be used?

- A. Create a Microsoft Dynamics NAV Server instance
- B. Create a Microsoft Dynamics NAV database
- C. Create a Microsoft Dynamics NAV user
- D. Import a Microsoft Dynamics NAV license

Correct Answer: A

QUESTION 5

You are configuring a new installation of Microsoft Dynamics NAV Server to be used for all available client types. The default port settings must be used.

You need to reduce the impact of configuration changes and service restarts.

What you should do?

- A. When changing the configuration, use the Microsoft Dynamics NAV Server Administration tool because it will apply changes without restarting the services.
- B. Create a separate instance for each service type.
- C. Create separate instances for each client type.
- D. Install Microsoft Dynamics NAV Server into clustered environment.

Correct Answer: A
