Correct Answer: D

---

### QUESTION 4

When running deduplication on SnapVault destinations, which 3 statements are true?

- A. The source (primary) system sends duplicated data even if the source data is deduplicated.
- B. Deduplication internally synchronizes with the SnapVault schedule on the destination.
- C. The source SnapVault data is deduplicated inline on the target before it is written to disk.

D. Deduplication savings are available after the baseline snapshot rolls off and the blocks are freed.

E. Deduplication with SnapVault creates a snapshot, deduplicates, then deletes and recreates the snapshot to effectively deduplicate savings.

Correct Answer: ABE

---

#### QUESTION 5
