- A. `Port initiators show`
- B. `Storage show initiators`
- C. `Portset show`

D. Fcp show initiators

Correct Answer: D

QUESTION 5

What is the purpose of RAID?

- A. RAID is a scheme that divides and replicates data among multiple physical disk drives.
- B. RAID protects disk data by creating a Snapshot copy of the data, which is then stored on a parity disk.
- C. RAID groups disks in a single enclosure.
- D. RAID combines multiple disk drives into an array of disk drives that performs better than a single large disk drive and provides fault tolerance.

Correct Answer: D
