QUESTION 1

Which of these is the correct explanation regarding SQLite database administration?

- A. The application owns database files.
- B. It is necessary to set a password.
- C. It is possible to have several database files.
- D. Database filenames must use the ".db" extension.

Correct Answer: A

QUESTION 2

The following program uses an Intent to open a Web page designated by a Web browser. Which is the correct code that goes into (1)?

```
01: Intent intent = new Intent(" (1) ", Uri.parse("http://www.oesf.jp/"));  
02: startActivity(intent);
```

- A. android.intent.VIEW
- B. android.intent.action.VIEW
- C. android.intent.View
- D. androidJntent.action.View

Correct Answer: B

QUESTION 3

Which of these is the correct explanation of the Android NDK?

- A. You can create a shared library using native code.
- B. Since it can be executed without a Datvik VM, high speed performance can be achieved.
- C. You can develop Android applications with just native code.
- D. Usage of NDK is recommended, though the source code may become more complex, because debugging and other operations are easier.

Correct Answer: A

QUESTION 4

Which of these is the incorrect explanation of the Android SDK and AVD Manager?

- A. They are provided from version 1.6 of the SDK. Up to Version 1.5, there was an AVD Manager but it lacked SDK management functions.
- B. You can create and startup AVD, and on startup you can delete user data up to that point.
- C. The "android" command can be used if "/tools" is added to the command path.
- D. The development tools that can be downloaded from Android SDK and AVD Manager are SDK- platform, NDK- platform, emulator images, and USB drivers for handsets.

Correct Answer: D

QUESTION 5

Which class in the wifi package holds Wi-Fi network configurations, including the security configuration?

- A. ScanResult
- B. Wifi Configuration
- C. WifiInfo
- D. WifiManager

Correct Answer: B
