### QUESTION 1

What is NOT a valid VariableAction?

- A. SetVariableAction
- B. ClearVariableAction
- C. ReadVariableAction
- D. AddVariableValueAction
- E. RemoveVariableValueAction

Correct Answer: A

### QUESTION 2

What symbol depicts a CallBehaviorAction?

- A. 
- B. 
- C. 
- D. 
- E. 

- A. Option A
- B. Option B
- C. Option C

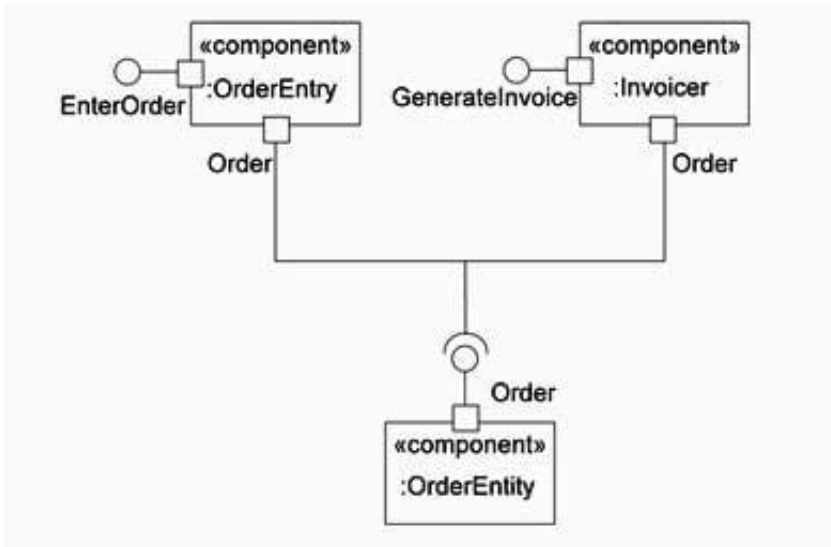

D. Option D

E. Option E

Correct Answer: E

### QUESTION 3

What best describes the semantics modeled by the exhibit?

A. OrderEntry and Invoicer are ports of OrderEntry.

B. OrderEntry delegates to both OrderEntry and Invoicer.

C. The OrderEntry component and the Invoicer component both require the services described by the Order interface and use an OrderEntry component that provides those services.

D. Signals travel from an OrderEntry port and an Invoicer port, and join into a composite signal that flows to an OrderEntry port. The signals flow along instances of the Order interface.

Correct Answer: C

### QUESTION 4

Which is true of a provided interface associated with a port?

A. represents an interface that must be defined within the classifier that owns the port

B. identifies the services that the object owning the port expects of objects connected via that port

C. identifies the services that the object owning the port can offer to other objects connected via that port

D. represents an interface that must be defined in the same package in which the classifier owning the port is defined

Correct Answer: C

### QUESTION 5

What objects receive a signal sent by a BroadcastSignalAction?

- A. all objects
- B. objects are determined by semantic variation
- C. all objects that have a reception for the signal
- D. objects that are on the same node as the actions
- E. objects that are instantiated from classes in the package of the action

Correct Answer: B
