### QUESTION 1

A customer wants to automate the rerun of a CandDS job each time a Modeler stream in one of the jobsteps is updated. How can this be achieved?

- A. A message-based job schedule can run a job, based on a notification message sent at the update of the Modeler stream.
- B. This can only be achieved through a time based schedule if the Modeler stream is updated at fixed times.
- C. CandDS does not allow this kind of dependency
- D. Define a "loop" connector between the Modeler jobstep and the job.

Correct Answer: A

---

### QUESTION 2

Which parameters describe the repository server definition that needs to be defined in the Modeler client to get access to the CandDS Content Repository?

- A. CandDS repository host name, port, temp files location
- B. CandDS repository host name, port, secure connection option
- C. CandDS repository host name, port, database name
- D. Modeler Server host name, Modeler port number, temp files location

Correct Answer: B

---

### QUESTION 3

How can a user verify the version of all packages that have been installed to the CandDS repository?

- A. Version.txt in the Deployment Manager client root folder
- B. Help/About in the Modeler client
- C. "About" menu, then Show Details, in the Browser-based Deployment Manager client
- D. Application server logs

Correct Answer: C

---

### QUESTION 4

An administrator has set up Notifications for multiple users on a particular Modeler stream in the Content Repository. One user complains of not receiving any notifications. Which of the following actions would allow the administrator to

verify if he has correctly set up a notification for this user?

- A. Select the job that runs the Modeler stream and verify if the user was added to the Success notifications with a correct email address.
- B. Right-click the Modeler stream and choose Notifications. Verify if the user has been added with a correct email address.
- C. Right-click the Modeler stream and choose Subscriptions. Verify if the user has been added with a correct email address.
- D. Right-click the Modeler stream and choose Manage Subscriptions. Verify if the user has been added with a correct email address.

Correct Answer: B

---

#### QUESTION 5

RandD fixed an issue with Modeler integration in Deployment Manager client. A Fix Pack has been released. For which product and which fix should the customer look on Fix Central?

- A. Product: CandDS; Fix Pack for CandDS Server
- B. Product: CandDS; Fix Pack for CandDS Adapter
- C. Product: Modeler; Fix Pack for Modeler Server
- D. Product: Modeler; Fix Pack for Modeler Adapter

Correct Answer: D
