- A. Compression is not supported in FileNet Content Manager 5.2.
- B. No Fixed Content Devices can be compressed.
- C. Only Fixed Content Devices can be compressed.
- D. All valid storage areas can contain both compressed and non-compressed content.

Correct Answer: D

QUESTION 2

Which event log is automatically created during the creation of an isolated region?

- A. VW_WO System OperationMsg
- B. VW_EventLog
- C. EventLog
- D. DefaultEventLog

Correct Answer: D

QUESTION 3

As part of an initial setup of Deployment Manager, a base set of XML files can be created to use as a template for configuration.

What is the command line used on a Microsoft Windowsbased server to create these XML files?

- A. DeploymentManagerCmd.bat --samples.
- B. DeploymentManagerCmd.bat --operation CreateBaseXML.
- C. DeploymentManagerCmd.bat --operation CreateEnvironment.
- D. DeploymentManagerCmd.bat --operation CreateDeployPackage.

Correct Answer: A

QUESTION 4

What is the purpose of FileNet Configuration Manager?

- A. Managing the P8 Domain.
- B. Creating a profile used to configure and deploy new or upgraded Content Platform Engine instances.
- C. Managing Content Platform Engine Object Stores.
- D. Creating an export file used for importing Content Platform Engine objects.

Correct Answer: B

QUESTION 5

While implementing a FileNet P8 solution, you would like to make content addition to the FileNet ECM repository easy, intuitive and productive to end users. The proposed solution should address requirements such as allow documents of a specific type to be added to a given folder, hide certain properties from the user when entering metadata for the document, and apply pre-configured security to documents. Which of the following techniques best addresses these requirements?

- A. Use a Form Policy Document.
- B. Use the default Add Document functionality provided in the IBM Content Navigator.
- C. Use a Search Template.
- D. Use a Document Entry Template.

Correct Answer: D
