QUESTION 1

Which type of process queues are available in CPE?

- A. Work, Component, User
- B. Work, Personal, Component
- C. Work, Case, Component
- D. Personal, Case, Component

Correct Answer: A

QUESTION 2

In which of the following situations should you use sub maps in a work flow?

- A. They can be used to implement simple work flows that have 4 or fewer steps.
- B. They can be used to breakdown complex work flows into more manageable pieces.
- C. They can be used to encapsulate all tasks in a work flow allowing the main map to hide details.
- D. B and C.

Correct Answer: D

QUESTION 3

Which of the following is NOT true about authentication for P8 custom applications?

- A. Kerberos is available with the CE .NET API.
- B. The CE Java API with CEWS transports unencrypted credentials. For protection, an encrypted connection using TLS/SSL should be used.
- C. Kerberos is available with the CE Java API when using CEWS transport.
- D. The CE Java API with EJB transport does not know or care what form of authentication was actually used as long as it is trusted by the CE application server

Correct Answer: C

QUESTION 4

Which of the following is NOT a standard, out-of-the-box feature of P8 security?

- A. There is a mechanism for default permissions by document class.

- B. There is a mechanism for automatically adjusting permissions during checkout/checkin cycles.
- C. Security can be modified individually on business objects.
- D. There is a mechanism for automatically adjusting permissions based on date and time.

Correct Answer: D

QUESTION 5

P8 follows industry practices in separating authentication (validating the identity of users) from authorization (controlling access to resources for identified users).

Which of the following is TRUE for P8's handling of authentication and authorization?

- A. Authentication is handled by the application server. Authorization is handled by P8.
- B. Authorization is handled by the application server. Authentication is handled by P8.
- C. P8 can handle authentication if the Password Synchronization feature is enabled.
- D. The Old Dogs New Tricks (ODNT) policy mechanism can be used to supplement the internal P8 authorization calculations.

Correct Answer: A
