QUESTION 1

All of the following statements about annotators are true, EXCEPT for:

A. A software component that performs specific linguistic analysis tasks and produces and records annotations.

B. Are always independent of (i.e., do not rely on) other annotators in the document processing pipeline.

C. Do the real work of extracting structured information from unstructured data.

D. Annotators typically read from and write to the common analysis structure.

E. May be collection specific, and are administered via the Configure document processing pipeline link on the Parse and Index tab.

Correct Answer: B

QUESTION 2

The Real-time NLP API has the following requirements, EXCEPT for:

A. The collection can either be a search collection or a text analytics collection.

B. The collection\\\'s search session must be running.

C. The collection\\\'s parse and index sessions must be running.

D. The NLP REST API accepts both text and binary content.

Correct Answer: A

QUESTION 3

LanguageWare Resource Workbench (LRW) has been significantly enhanced to work with ICA. Which of the following is NOT one of these LRW improvements?

A. A Type catalog has been added to simplify searching for types (and their associated resources) and renaming types (to ensure workspace consistency).

B. LRW users can export a UIMA pipeline directly from the LRW and have it installed as the Custom annotator stage of an ICA collection.

C. LRW users can send one or more documents to ICA to be annotated by the pipeline configured for one of the collections on the server.

D. LRW Users can export a UIMA pipeline to an ICA search collection.

Correct Answer: D

QUESTION 4

Custom rule files are implemented by the _____ annotator in the document processing pipeline.

A. Dictionary lookup.

B. Linguistic analysis.

C. Named entity recognition.

D. Pattern matcher.

Correct Answer: D

QUESTION 5

What do Export plug-ins allow you to do?

A. Implement custom logic when exporting crawled, analyzed or searched documents.

B. Change indexed content when exporting analyzed documents.

C. Use the real-time NLP API to perform ad-hoc text analytics on a document.

D. Export collection configuration information.

Correct Answer: A
