### QUESTION 1

Select two suitable statements about postgresql.conf configuration.

- A. A line that starts with ! (exclamation mark) is interpreted as a comment.
- B. You can have different parameters for the same option to configure each database differently.
- C. The timing of when a change in any value is reflected is different depending on the configuration parameter.
- D. All options have no default values. Therefore, all of them must be set specifically and thoroughly.
- E. As a boolean value, any of the following can be used: TRUE, FALSE, ON, OFF, YES, NO, 0.1

Correct Answer: CE

---

### QUESTION 2

Select two suitable statements about major version upgrades of PostgreSQL from below.

- A. You can use the databases of the old major version.
- B. To use the data from the old version, you only need to replace the program.
- C. To use the data from the old version, you need to conduct a backup and restore.
- D. There is a possibility of configuration parameter changes after major version upgrades.
- E. Upgrade scripts can be executed while the old version of PostgreSQL is running.

Correct Answer: CD

---

### QUESTION 3

What does the following command do? Select two correct descriptions regarding this SQL statement. `SELECT * FROM information_schema.tables;`

- A. Requests a list of defined tables in the currently connected database.
- B. Requests a list of defined tables in the "information\_schema" database.
- C. Requests the contents of the "tables" table in the "information\_schema" database.
- D. Requests the contents of the "tables" table in the "information\_schema" schema.
- E. Requests a list of defined tables in the "information\_schema" schema.

Correct Answer: AD

---

#### QUESTION 4

Select the most suitable statement about the creation of a new database.

- A. Only a PostgreSQL superuser is authorized to create a new database.
- B. The target directory is specified by the environment variable PGDATA or the -D parameter when creating a database.
- C. Only one database can be used at the same time even if two or more databases are created.
- D. Only the OS superuser (root) can create databases.
- E. You can set the character encoding when creating a new database.

Correct Answer: E

---

#### QUESTION 5

I would like to set the default character encoding for the client to Unicode. Select the most appropriate configuration parameter in postgresql.conf from those below.

- A. backend\_encoding = UNICODE
- B. frontend\_encoding = UNICODE
- C. client\_encoding = UNICODE
- D. default\_encoding = UTF8
- E. encoding = UTF8

Correct Answer: C
