QUESTION 1

Given: In Single-Channel Architecture (SCA) systems, multiple access points can use the same BSSID. This feature allows for the creation of a network-wide virtual access point that can be applied across multiple physical access points operating on the same channel.

What benefit does this solution offer?

- A. The virtual AP can be managed using a WIPS platform
- B. Transmissions travel farther since they are repeated by other APs
- C. A wider variety of available security mechanisms are available
- D. Client stations do not have to make roaming decisions

Correct Answer: D

QUESTION 2

Which explanations of antenna usage are the most accurate? (Choose 2)

- A. A parabolic dish antenna is ideal for directing a beam down a long hallway.
- B. An omni-directional antenna is well-suited to provide wireless coverage in most homes.
- C. Patch antennas are mounted in the center of a lecture hall to provide circular coverage.
- D. A dipole antenna is mounted to a perimeter wall in school buildings to provide coverage inside the building.
- E. A grid antenna is designed to perform favorably as part of an outdoor point-to-point link under windy conditions.

Correct Answer: BE

QUESTION 3

In preparation for site surveys, your company is creating a questionnaire that will help you understand your customer's client connectivity requirements. What question is NOT appropriate for your company's presurvey questionnaire?

- A. What applications will be used by Wi-Fi client devices on the wireless network?
- B. How will Power over Ethernet (PoE) be supplied to Wi-Fi client devices?
- C. How many concurrent Wi-Fi client connections are expected on the wireless network?
- D. What types of Wi-Fi client devices will be connected to the wireless network?
- E. What 802.11 physical technology (PHY) will be used by the Wi-Fi client devices?

Correct Answer: B

QUESTION 4

Given: You are recommending an AP for use in a warehouse environment. Some APs will require directional antennas and others will use dipole antennas.

What feature must be supported by the APs in this installation?

- A. Multiple SSIDs
- B. Grounding wire connectors
- C. Pole mounts
- D. External antennas
- E. Variable output power

Correct Answer: D

QUESTION 5

Which scenario represents an improper installation for an AP with low-gain omnidirectional antennas?

- A. Placed above the doorway, at one end of a long hallway
- B. Placed on the ceiling, near the center of a meeting room
- C. Mounted near the middle of a small branch office
- D. Placed on a centrally-located desk in a small office

Correct Answer: A
