QUESTION 1

The Carrier Sense Multiple Access with Collision Avoidance (CSMA/CA) protocol is necessary in Wi-Fi networks because _____.

- A. RF transmissions can be captured and decrypted without CSMA/CA.
- B. Wi-Fi clients need a standardized method of conserving battery power.
- C. 802.11g and 802.11b transceivers need an interpreter for compatibility.
- D. The wireless transmission medium is half-duplex, thus shared by all users.
- E. Wireless data must be converted to a format that is compatible with Ethernet networks.

Correct Answer: D

QUESTION 2

As an alternative to using leased lines to connect two offices on the same campus, your customer wants to implement a Wi-Fi solution. When asked by your customer, what advantages do you cite regarding use of a Wi-Fi infrastructure instead of a leased line? (Choose 2)

- A. Wi-Fi implementations are more reliable than leased lines.
- B. Wi-Fi implementations have a lower total cost of ownership than leased lines.
- C. Wi-Fi implementations are not susceptible to outages caused by inclement weather.
- D. Wi-Fi implementations support larger numbers of simultaneous connections than leased lines.
- E. Wi-Fi implementations offer more flexibility and easier expansion than leased lines.

Correct Answer: BE

QUESTION 3

You are hired by ABC Company to recommend an appropriate solution for their wireless network. They would like to operate in the 2.4 GHz ISM frequency band and will require data throughput in excess of 10 Mbps. To meet that need, you recommend equipment compliant with the _____ or _____ amendments to the 802.11 standard. (Choose 2)

- A. 802.11a
- B. 802.11b
- C. 802.11i
- D. 802.11g
- E. 802.11n

Correct Answer: DE

QUESTION 4

As part of a pre-deployment manual RF site survey, your manager has assigned to you the task of documenting security and interference details about existing WLANs in the building. What is the best tool for locating and collecting information about existing APs in the building?

- A. Spectrum analyzer
- B. Wi-Fi client utilities
- C. Wireless protocol analyzer
- D. Predictive analysis software
- E. WLAN controller

Correct Answer: C

QUESTION 5

Where is the use of a Wireless Internet Service Provider (WISP) most appropriate?

- A. Wi-Fi bridging between two or more buildings within a city
- B. To provide guest access to the Internet in an office building
- C. As hot-spot connectivity in large airports and conference centers
- D. Last mile wireless data delivery to homes and businesses

Correct Answer: D
