-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Given: In a single channel architecture (SCA) WLAN system, 802.11n (HT) APs should not share an SSID with 802.11g (ERP) APs.

What is the reason for this recommendation?

- A. Client stations would see two different sets of AP capabilities as they roam between APs with the same BSSID.
- B. The added range of 802.11n APs would cause additional co-channel interference.
- C. The additional beacon material in 802.11n beacons would confuse 802.11b/g client stations.
- D. Beacons from 802.11n APs use 40 MHz channels, while beacons from 802.11g APs use 20 MHz channels.

Correct Answer: A

QUESTION 2

What distinguishes an independent basic service set (IBSS) from an infrastructure basic service set (BSS)?

- A. An IBSS does not have a distribution system (DS), but a BSS does.
- B. An IBSS does not require beacon frames, but a BSS does.
- C. An IBSS does not support 802.11 authentication or association, but a BSS does.
- D. An IBSS can only operate on a single channel, but a BSS can operate on multiple channels.

Correct Answer: A

QUESTION 3

The IEEE 802.11a/n physical layer technologies utilize the 5 GHz frequency band. What is true of the two lower bands (UNII-1 and UNII-2) in this frequency spectrum? (Choose two)

- A. The frequency range of these bands is 5000 MHz - 5200 MHz
- B. Each of these two bands contain five 20 MHz channels.
- C. Regulatory domains worldwide require DFS and TPC in these bands.
- D. These bands have a total combined bandwidth of 200 MHz.
- E. 20 MHz in each of these bands is reserved as a guard band.

Correct Answer: DE

QUESTION 4

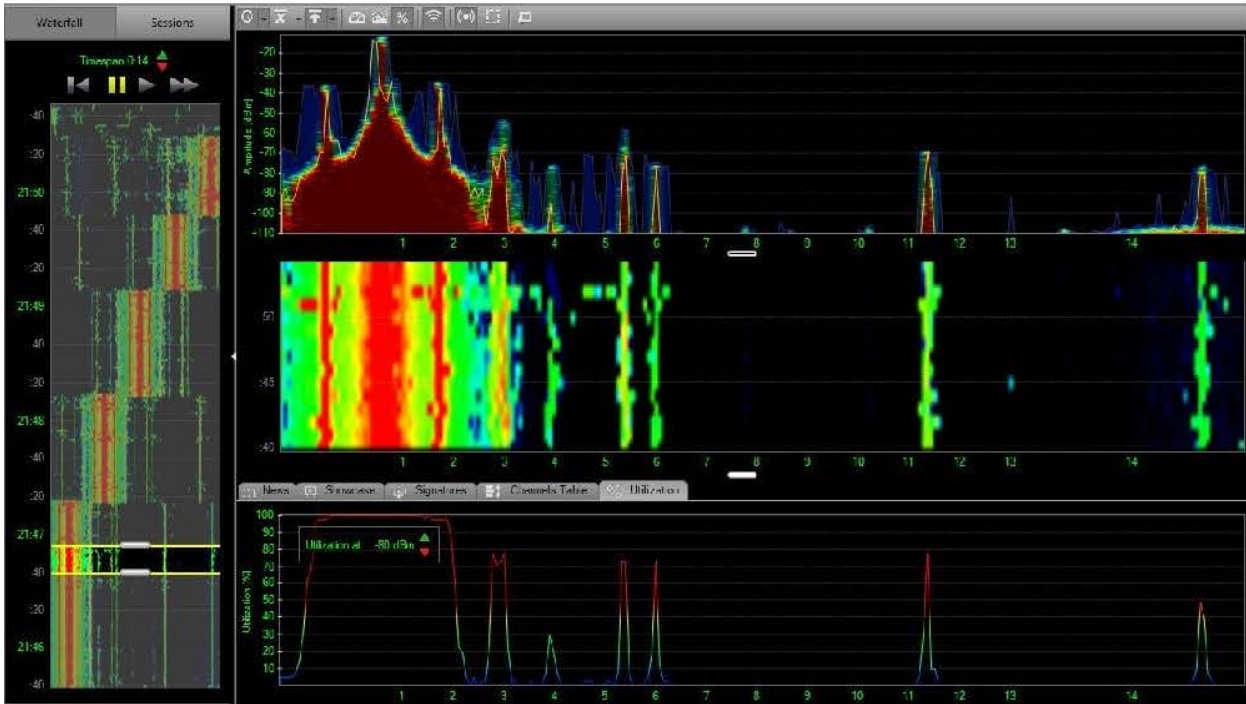

What problems may occur when there are hidden nodes in the BSS?

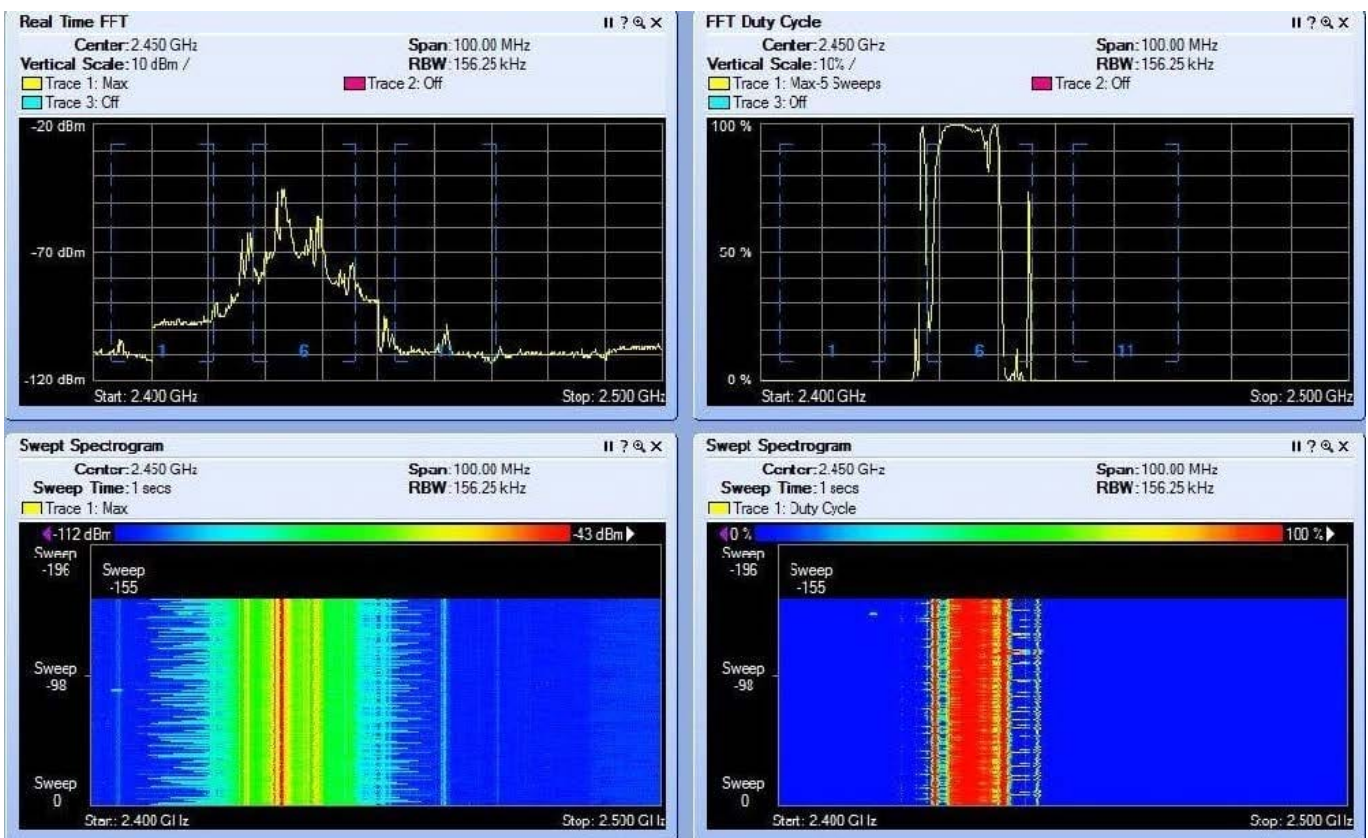

- A. Increase in downlink (transmitted by AP) frame retries
- B. High retransmission count for a subset of client stations
- C. Use of frame fragmentation with fragment bursts
- D. Excessive use of null data frames
- E. Duration values vary widely in each data frame

Correct Answer: B

QUESTION 5

What type of RF transmitter is shown in both of the spectrum analysis exhibits?

- A. Military radar
- B. Bluetooth mouse
- C. Microwave oven
- D. Wireless video camera
- E. WIPS sensor

Correct Answer: D
