### QUESTION 1

The Orion NPM administrator wants to add the company ticketing website as a menu item within the Web Console. What is the most time-efficient way to accomplish this goal for all user accounts?

- A. add a custom html resource to the Summary view
- B. add user-defined links to the Menu bar
- C. add a custom link to the Modules bar
- D. add an external website to the Menu bar

Correct Answer: D

---

### QUESTION 2

What should you do to track whether a new configuration has alleviated slow network performance?

- A. compare ICMP availability before and after the change
- B. compare application responsiveness before and after the change
- C. monitor the affected devices for stability
- D. monitor bandwidth utilization on affected interfaces

Correct Answer: B

---

### QUESTION 3

From your core site, your network management system (NMS) has detected that both the WAN router and the switch in one of your remote sites are unreachable. What should be your first step in identifying the root cause?

- A. examine the state of the adjacent core router's interface
- B. examine the switch configuration at the core site
- C. examine the router configuration at the remote site
- D. examine the state of the remote router's WAN interface

Correct Answer: A

---

### QUESTION 4

Your network has a few critical devices on the other side of a WAN link from your Orion server. If the router (name = "target") connecting Orion to the remote site goes down, you do not want alerts about those devices. How should you configure Orion NPM Alert Suppression within the Advance Alert Engine to achieve your goal?

- A. suppress alert when any of the following apply: Node Name is equal to "target" | NodeStatus is equal to "Down"
- B. suppress alert when any of the following apply: Node Name is equal to "target" | Interface Status is equal to "Down"
- C. suppress alert when all of the following apply: Node Name is equal to "target" | Interface Status is equal to "Down"
- D. suppress alert when all of the following apply: Node Name is equal to "target" | Node Status is equal to "Down"

Correct Answer: D

---

#### QUESTION 5

You are using NetFlow to analyze the traffic on your network. You notice that you have a large amount of traffic originating from various systems in your network destined to a single unrecognized off-net IP address during otherwise off-peak hours. What is the most likely cause?

- A. a new, popular YouTube video being sent around the office
- B. a malware or virus breakout on your network
- C. automated server backups occurring within your network
- D. higher than average VoIP usage from your overseas sites

Correct Answer: B
