#### QUESTION 1

What are two supported ways to integrate Orion NPM with other network management solutions? (Choose two.)

- A. TCL/TK
- B. Python API
- C. J2EE
- D. Syslog
- E. SNMP traps

Correct Answer: DE

---

#### QUESTION 2

You want to configure a device to send a message when a specific event happens and have Orion NPM send an email when it receives that message. Which two steps must you take to achieve this goal? (Choose two.)

- A. configure Orion System Manager to trigger an alert when any type of message is received
- B. configure the device to send the target SNMP trap to the Orion IP address
- C. configure the Orion Web Console to trigger an alert when any type of message is received
- D. configure a rule in the Orion Trap Viewer to trigger when the target trap is received
- E. configure Orion SNMP Trap service to trigger an alert when a target Syslog message is received

Correct Answer: BD

---

#### QUESTION 3

As your Orion NPM deployment grows, you need to add pollers to the system, but due to budgetary constraints, you are unable to do so. What should you do in the short term to allow you to add a few more elements?

- A. adjust polling intervals
- B. adjust data retentions
- C. reduce the number of reports
- D. reduce the number of users

Correct Answer: A

---

#### QUESTION 4

An Orion NPM web user has requested that a link to an external website be added to the Orion Web Console when looking at devices. However, you want to avoid making global changes to all web users. Which two steps are required to accomplish this task? (Choose two.)

- A. add the resource User Links to the Network Summary view
- B. add the resource Custom HTML or Test to the Interface Details view
- C. assign a custom Node Details view to this user's account
- D. add the resource User Defined Links to the Node Details view
- E. assigns an Account Limitation to all other user accounts

Correct Answer: CD

---

#### QUESTION 5

You are planning a network management implementation where the network has several low bandwidth WAN links. Which two network management protocols are most likely to cause heavy traffic on WANs and should therefore be considered carefully before deployment? (Choose two.)

- A. Syslog
- B. SSH
- C. SMTP
- D. NetFlow
- E. ICMP

Correct Answer: AD
