QUESTION 1

An administrator tests a new Application and Device Control policy. One of the rule sets being tested blocks the notepad.exe application from running. After pushing the policy to a test client, the administrator finds that notepad.exe is still able to run. The administrator verifies that the rule set is enabled in the Application and Device Control policy. Which two reasons may be preventing the policy from performing the application blocking? (Select two.)

A. The System Lockdown policy includes notepad.exe in the whitelist.

B. System Lockdown has been removed from the client.

C. The Client User Interface Control is set to Client control.

D. The rule set is in Production mode.

E. A rule set with conflicting rules exists higher up in the policy.

Correct Answer: AE
