QUESTION 1

What are two properties of a Repeat On Error Until True group? (Choose two.)

- A. The group activities will be executed again if there is no error and the condition evaluates true.
- B. The group activities will be executed again if there is an error and the condition evaluates false.
- C. An Index Name variable counts the number of repetitions beginning with number 1, provided an error occurs.
- D. An Index Name variable counts through the number of members in a Variable List, beginning with number 1, provided an error occurs.
- E. An Index Name variable counts the number of repetitions beginning with number 1, until an error occurs and the condition evaluates false.

Correct Answer: BC

QUESTION 2

A TIBCO BusinessWorks installation spans multiple secure subnets with insecure interconnections. It must protect credit card numbers in messages traveling among subnets. Which three designs are secure? (Choose three.)

- A. using only JMS Connections configured for SSL
- B. using SSL wherever available in TIBCO Designer
- C. doing custom encryption/decryption over unsecure transports
- D. using only Rendezvous transports with the Use SSL option checked
- E. using only Rendezvous transports and restricting Rendezvous daemons to use SSL for connections outside their subnet

Correct Answer: ACE

QUESTION 3

Which two statements are true about the BusinessWorks process definition group with the group action of type '\\none\\'? (Choose two.)

- A. It allows creating a transition out of the group back into the group.
- B. It overrides individual activity error handlers for activities in the group.
- C. By collapsing the grouped items to a single icon, the process definition diagram is cleaner and smaller.
- D. It allows you to have a single error handler for any error created by any activity within the group which does not have its own error handler.

Correct Answer: CD

QUESTION 4

When used in the project, which four are automatically included when you build an Enterprise Archive? (Choose four.)

- A. third-party libraries
- B. activity custom schema
- C. JMS Connection configurations
- D. BusinessWorks Runtime Engine
- E. JDBC Connection configurations
- F. TIBCO Rendezvous Transport configurations

Correct Answer: BCEF

QUESTION 5

You are designing a system that is intended to scale out in the future. Which two messaging techniques are valid? (Choose two.)

- A. a JMS Queue Receiver
- B. a Rendezvous Publisher using rvcache
- C. a JMS service configured for fault tolerance
- D. a Rendezvous Subscriber using Distributed Queue

Correct Answer: AD
