QUESTION 1

As part of setting up your company's disaster recovery plan, the technical project manager has identified the need to synchronize storage used by your cloud VMs to the remote disaster recovery site. Which of the following will you use to setup storage synchronization?

- A. vCloud Connector
- B. vSphere Replication
- C. Datastore Clusters
- D. vCloud Automation Center

Correct Answer: C

Reference: <http://www.vmware.com/business-continuity/disaster-recovery>

QUESTION 2

You have successfully completed the initial deployment of your company's cloud. Now management wants to make sure everything continues to run well and that you are meeting all of your SLAs. Which vCloud Suite software component will best help you do this?

- A. vCenter Automation Center
- B. vCloud Management Assistant
- C. vSphere Management Assistant Appliance
- D. vCenter Operations Management Suite

Correct Answer: D

Explanation: <http://virtualizationreview.com/articles/2011/04/26/get-started-with-vcenter-operations.aspx>

QUESTION 3

You and a new hire have been assigned the task of building out the Org vDC and Provider vDC components of your company's new private cloud. You give the Org vDC part to the new hire and she asks you: "What is this Org vDC thing I will be building?" How do you describe an Org vDC to her?

- A. An Org vDC is the source or parent of Provider vDCs
- B. An Org vDC is a partitioned subset of a Provider vDC
- C. An Org vDC is a collection of compute, memory and storage resources from one vCenter
- D. An Org vDC can combine the resources from multiple vCenter Servers

Correct Answer: B

(4th row of the table)

QUESTION 4

Management at your company has asked you to give a presentation outlining why you want to move to a private cloud. As part of this presentation you are explaining vCloud Director and its capabilities. Which of the following describes something vCloud Director can do for your cloud project?

- A. Provide Fault Tolerance (FT) protection for your cloud workloads
- B. Move workloads between a private and a public cloud
- C. Allow multiple tenants to run on the same vSphere Cluster
- D. Move your cloud to a remote site when disaster strikes

Correct Answer: C

Reference: <http://www.vmware.com/files/pdf/VMware-Architecting-vCloud-WP.pdf> (page 15, vcloud director constructs)

QUESTION 5

You will be deploying a new vCloud vApp which needs storage with specific capabilities. In the past, this had been accomplished by manually assigning your datastores to a service level such as "Tier 1," "Tier 2," and so on. Your SAN infrastructure is large and complicated enough that you do not want to do this manually as it is tedious and error prone. What technology helps eliminate a lot of the manual work involved in defining tiered storage used in your cloud?

- A. Catalogs
- B. Resource Pools
- C. VASA
- D. Storage vMotion

Correct Answer: C
