QUESTION 2

As a consultant, you are advising a large enterprise client that is evaluating moving to a cloud infrastructure. This client is running the majority of their servers in a virtualized vSphere environment and want you to explain the benefits of deploying a private cloud.

Which scenario would be a compelling reason for their client to make the jump to the cloud?

- A. They will be able to use storage clusters and Storage DRS
- B. They will be able to place their mission-critical VMs under FT protection
- C. vCloud Automation Center will allow them to leverage vSphere Distributed Switches
- D. They will be able to more simply and quickly provision workloads

Correct Answer: D

QUESTION 3

You received an email from your cloud team's senior technical architect asking you to implement snapshots in your cloud where it makes sense to do so. You ask the architect to clarify where in your cloud it would make the most sense to use snapshots. Which of the following is the most likely answer they would give you?

- A. Catalogs: To back out any unauthorized changes
- B. Production web servers: To provide a backup of each day's changes
- C. Development VMs: To roll back code updates
- D. vApps: To roll back to their original deployment state

Correct Answer: C

QUESTION 4

Your manager asks you to set up your company's private cloud so that you can provide various compute and storage service level offerings. What component in vCloud Director would you configure to provide the different service level offerings?

- A. Storage Clusters
- B. vCenter Resource Pools
- C. Provider vDC
- D. Org vDC

Correct Answer: C

QUESTION 5

In planning for your upcoming transition to vCloud Automation Center, your manager asks if you can leverage your existing vSphere 5.5 infrastructure to deploy services. How should you respond?

- A. We cannot use our existing vSphere infrastructure as vCloud Automation Center can only utilize vCloud Hybrid service deployments
- B. We can use our existing vSphere infrastructure, but must deploy a minimum of two vCloud Automation Center endpoints
- C. We can use our existing vSphere infrastructure but must reinstall vCenter
- D. We can use our existing vSphere infrastructure to deploy vCloud Automation Center

Correct Answer: C
