QUESTION 1

Your company has been watching the news and seen many examples of natural disasters, fires, acts of terrorism, etc. that have disrupted operations. They decide that they need a geographically separate data center to fail over to. They also have noticed that many times the IT staff are unavailable after the event and so ask for a solution that a corporate executive could use to fail over if IT is unavailable. What solution best fits these requirements?

- A. Fault Tolerance (FT)
- B. Site Recovery Manager (SRM)
- C. vSphere Replication (VR)
- D. Data Protection

Correct Answer: C

QUESTION 2

You work for a small company that can't afford to upgrade the entire environment at once. Currently you have several small servers with internal storage on each. You desire to automate the environment as much as possible (using vMotion, DRS, HA, etc.) so you have time to work on other projects. Which of these choices will best meet these goals?

- A. Buy shared storage.
- B. Buy servers with more RAM.
- C. Buy servers with more CPUs.
- D. Upgrade the network to 10 GbE.

Correct Answer: D

QUESTION 3

Your company is planning to migrate your datacenter to a new location, but they wish to minimize downtime during the transition. You are entirely virtualized at your primary datacenter, and have been given funding to acquire new hardware for the new datacenter. Which of the following products can help you migrate the VMs to the new datacenter?

- A. vCenter Operations Manager
- B. vCenter Configuration Manager
- C. vCenter Site Recovery Manager
- D. vCenter Converter

Correct Answer: C

QUESTION 4

You are planning to perform hardware maintenance on one of your ESXi hosts. It is currently running several Virtual Machines that you do not wish to power off. Which vCenter feature will allow you to perform this maintenance without disrupting the VMs?

- A. vMotion
- B. High Availability
- C. vSphere Replication
- D. vSphere Distributed Switch

Correct Answer: A

QUESTION 5

You are the VMware Administrator for the local city government. When you arrive at your desk, you find that there are several alarms referring to an outage caused by an overnight driver update. When you ask your colleagues about the driver update, no one seems to know anything about it. Which solution will help in determining the problem?

- A. A PowerShell script to gather hardware driver versioning information
- B. vCenter Configuration Manager (vCCM)
- C. The vCenter Virtual Appliance
- D. vProtect

Correct Answer: B
