QUESTION 1

You are a VMware architect employed to design and build application environments and the underlying platform for a software development company. The company is using a "devops" approach and has engaged with you at the beginning of the first planning meeting/pre-sprint. The software has yet to be written. However, you have some high-level specifications that are subject to change at each of the early meetings.

The _____ is more logical for virtual machine sizing.

- A. predictive sizing approach based on current software
- B. adaptive sizing approach

Correct Answer: B

QUESTION 2

A host has three dual-port network cards. What is the maximum number of vSwitches that can be integrated with the physical network, assuming that network redundancy is not a requirement?

- A. 3
- B. 6
- C. 256
- D. 512

Correct Answer: B

QUESTION 3

A(n) _____ is an item that is taken to be true in the design phases but has not been tested prior to execution.

- A. requirement
- B. constraint
- C. assumption
