#### QUESTION 1

A logical diagram shows vendor-specific information.

- A. True
- B. False

Correct Answer: B

---

#### QUESTION 2

You are a VMware technical contact for an application development project. The system consists of a multitier application. In addition to you, the project team consists of three developers and a project manager. You are required to create various environments for different stages of the SDLC. The developers will be developing in silos on various hardware (laptops, Windows 7 desktops, vSphere hosted). Which of the following delivery methods would be the easiest to manage and deploy?

- A. Create the virtual servers using an in-house template and export each VM and present the server OVF files to each developer for copying and importing.
- B. Create servers for an environment and place them within a vApp object, export the vApp object as OVF files, and present the OVF files to the dev team for copying and importing.
- C. Create servers for an environment and place them within a vApp object, export the vApp object as an OVF file, and present the file to the dev team for copying and importing.

Correct Answer: C

---

#### QUESTION 3

A project vision in some cases may not be achieved due to constraints, risks, and other project factors. However, a project vision is required to guide a project throughout the life cycle.

- A. True
- B. False

Correct Answer: A

---

#### QUESTION 4

Active discovery methods require agents.

- A. True
- B. False

Correct Answer: A

---

### QUESTION 5

You are a VMware architect working at a company where a business application is being rolled out. Based on conversations with the business, you establish that the RTO requirement is 2 hours, and the RPO requirement is 3 hours. Consider a situation in which the VMware platform is out of service following multiple hardware issues. The application dropped from service at 2 p.m. To meet the application business SLA, which of the following is true?

- A. When the application is brought online, the data must be from a version as of 4 p.m.
- B. When the application is brought online, the data must be from a version as of 11 a.m.

Correct Answer: B
