QUESTION 1

An administrator would like to set up Host Profiles in a vSphere architecture. Using the vSphere Client, the administrator connects to vCenter Server and navigates to Management, then begins to build a new Host Profile but is unable to save the profile.

Why is the administrator unable to save the completed profile?

- A. The administrator does not have the proper vSphere edition so this feature is not licensed.
- B. The Host Profiles service is stopped and must be restarted to access this option.
- C. No ESXi hosts have been added to vCenter Server, and this option will not be available until at least one host is managed.
- D. No DRS/HA Cluster has been defined, and Host Profiles must be applied to a cluster.

Correct Answer: A

QUESTION 2

A VMFS3 datastore has just been upgraded to VMFS5.

In what two ways does this affect the partition format? (Choose two)

- A. The partition format is retained, which is the MBR (Master Boot Record) format.
- B. The partition format is retained, which is the MBR (Master Boot Record) format. To change the GPT (GUID Partition table) format, the datastore must be re-formatted.
- C. The partition format is retained, but will be upgraded to GPT (GUID Partition Table) format once the datastore exceeds 2TB.
- D. The partition format is upgraded to the GPT (GUID Partition table) format

Correct Answer: AC

QUESTION 3

Which VMware solution allows for the automated discovery and mapping of applications running over the VM infrastructure?

- A. VMware vCloud Director
- B. VMware vCenter Infrastructure Navigator
- C. VMware Service Manager
- D. VMware vSphere 5

Correct Answer: B

QUESTION 4

The remote console performance for a virtual machine on an ESXi host appears to be degraded. What are two possible causes of the problem? (Choose two)

- A. The virtual NIC assigned to the virtual machine has a speed or duplex mismatch.
- B. The physical NIC assigned to the virtual machine port group containing the affected virtual machine has a speed or duplex mismatch.
- C. The physical NIC assigned to the Service Console port group has a speed or duplex mismatch.
- D. The physical NIC assigned to the VMkernel port group has a speed or duplex mismatch.

Correct Answer: BD

QUESTION 5

An administrator finds that vMotion and Storage vMotion operations do not succeed on a virtual machine. The virtual machine has been configured with N_Port ID Virtualization. The virtual machine has two data RDMs, one using a RAID5 LUN and one using a RAID0+1 LUN. The mapping file for the RAID5 LUN was created on the same datastore as the virtual machine, and the mapping file for the RAID0+1 LUN was placed in a datastore used for production data virtual disks. Which two statements are true about this configuration? (Choose two.)

- A. Storage vMotion cannot be used unless both mapping files are placed on the same datastore.
- B. vMotion cannot be used unless both mapping files are placed on the same datastore.
- C. vMotion cannot be used with RDMs.
- D. Storage vMotion cannot be used with NPIV.

Correct Answer: BD
