### QUESTION 1

A new patient presents to the ophthalmologist with a complaint of visual disturbances and decreased vision for one month. He has blind spots in his peripheral visual field. A comprehensive medical eye exam is performed, in addition to fundus photography and an extended visual field examination. The interpretation and report are in the medical record. Final diagnosis is primary open angle glaucoma, mild stage in both eyes.

What CPT?and ICD-10-CM codes are reported?

- A. 92004, 92250, 92081, H40.1111, H40.1121
- B. 92002, 92250, 92083, H40.1111, H40.1121
- C. 92004, 92250, 92083, H40.1131
- D. 92002, 92250, 92082, H40.1131

Correct Answer: A

---

### QUESTION 2

A patient is diagnosed with sepsis and associated acute respiratory failure. What ICD-10-CM code selection is reported?

- A. A41.9, R65.20, J96.00
- B. A41.9
- C. A41.9, R65.21, J96.00
- D. A41.9, J96.00

Correct Answer: D

---

### QUESTION 3

The CPT?code book provides full descriptions of medical procedures, although some descriptions require the use of a semicolon (;) to distinguish among closely related procedures.

What is the full description of CPT?code 69644?

- A. Tympanoplasty with mastoidectomy (including canalplasty. middle ear surgery, tympanic membrane repair); with intact or reconstructed canal wall, with ossicular chain reconstruction
- B. Without ossicular chain reconstruction with intact or reconstructed canal wall, with ossicular chain reconstruction
- C. With intact or reconstructed canal wall with ossicular chain reconstruction
- D. Tympanoplasty with mastoidectomy (including canalplasty. middle ear surgery, tympanic membrane repair); without ossicular chain reconstruction with intact or reconstructed canal wall, with ossicular chain reconstruction

---

Correct Answer: A

---

#### QUESTION 4

The mediastinum is:

- A. A location in the chest, bounded by the sternum, diaphragm, and lungs
- B. A small endocrine organ behind the heart
- C. A part of the lymphatic system
- D. Both the heart and lungs

Correct Answer: A

---

#### QUESTION 5

A patient has a malfunctioning ventricular electrode. The operative report reflects that the cardiologist made an incision into the subclavicular pocket, which housed a single chamber pacemaker. He detached the malfunctioning ventricular electrode, removed it from the patient, and made the decision to have a thoracic surgeon implant an epicardial lead later in the day (no new hardware was implanted). He then closed the skin pocket with multiple layers of suture.

Which CPT?code is reported for the cardiologist's service?

- A. 33234
- B. 33249
- C. 33235
- D. 33236

Correct Answer: B
