**Network Settings >> Network Access**

Access Protocols Authentication Trust Windows Proxy

**Network Access**  
Options for basic network access.

\* Name: Employee\_Secure  
Enter a name for the network.

Description: Connect to the example network.  
Enter a description for the network.

\* Network Type: Wireless only  
Select which types of network will be provisioned.  
Enterprise security (802.1X) will be selected if wired networks are to be supported.

\* Security Type: Enterprise (802.1X)  
Select the authentication method used for the network.  
Enterprise security (802.1X) will be selected if wired networks are to be supported.

**Wireless Network Settings**  
Options for wireless network access.

\* Security Version: WPA2 with AES (recommended)  
Select the WPA encryption version for the wireless network.  
This setting is used for Windows, Android and Legacy OS X (10.5/6) devices only.  
iOS and OS X 10.7+ (Lion or later) devices auto-detect the WPA version.

\* SSID: secure\_emp  
Enter the SSID of the wireless network to connect to.

Wireless: ☒ Hidden network  
Select this option if the wireless network is not open or broadcasting.

Which of the following statements is true regarding the above configuration for network settings? (Choose 2)

- A. Onboarded devices will connect to Employee\_Secure SSID after provisioning.
- B. Onboarded devices will connect to secure\_emp SSID after provisioning.
- C. Users will connect to Employee\_Secure SSID for provisioning their devices.
- D. Users must enter a Pre-shared key to connect to the network.
- E. Users will do 802.1X authentication when connecting to the SSID.

Correct Answer: BE

## QUESTION 2
