QUESTION 1

Analyze the workflow scheme for the SSP project shown below:

Workflow	Issue Types
Software Simplified Workflow for Project SSP (View as text)	 Story  Epic  Task  Sub-task (Assign)
classic default workflow (View as text)	 Bug (Assign)

Which change would require an update to the workflow scheme?

- A. Task and Story need different screens when they are transitioned to Done.
- B. Task and Story need a different screen when they are being created.
- C. Epic and Bug need different screens when they are transitioned to Done.
- D. Sub-task and Bug need a different set of required fields.
- E. Task and Sub-task need a different set of required fields.

Correct Answer: D

QUESTION 2

A user approaches you with a problem.

She cannot see or edit the Priority system field on any of the screens of a Process Management project.

What explains the problem?

- A. The field does not have the correct configuration context.
- B. She is not listed in the priority scheme.
- C. The field is hidden in the field configuration.
- D. The field is not available for this project template.
- E. She does not have the correct permission.

Correct Answer: C

QUESTION 3

Malik is a project administrator for the HR project.

He cannot remove the Fix Version/s field from the HR project screen. Why is he NOT able to do this?

- A. Fix Version/s for the project have been archived.
- B. The Fix Version/s field is locked.
- C. The screen is used by another project.
- D. System fields cannot be removed from screens.
- E. Fix Version/s is a required field.

Correct Answer: A

No further changes can be made to this version unless it is un-archived. Also it is not possible to remove any existing archived versions from an issue's affected and fix version fields or add any new archived versions.

QUESTION 4

How do you configure the default unit for time tracking (minute, hour, day, week) in Jira?

- A. per issue type
- B. per project
- C. per user
- D. per group
- E. per instance

Correct Answer: A

QUESTION 5

Users typically forget to add components when they create new issues. As a result, most of the newly created issues get assigned to Tom, who is the project lead.

Tom reviews all of the issues, and wants to triage them based on component selection. But when he edits an issue and

adds a component, the assignee does not change.

Why does the assignee not change when adding a component to an issue?

- A. Auto-assignment with components only works when creating issues.
- B. The project's default assignee overwrites the value of the component lead.
- C. The default assignee of the selected components is set to Project default.
- D. The Assignee field additionally needs to be changed to Automatic.
- E. The selected components do not have a component lead set.

Correct Answer: B
