QUESTION 1

Anti-DDoS Premium Service is a value-added service intended to address the problem of service interruption caused by DDoS attack to servers including non-Alibaba Cloud hosts)

Users can configure a protected IP address so that the attack traffic can be redirected to this IP address, thereby ensuring the stability and reliability of the origin site. When a user configures Anti-DDoS Premium Service and imports an HTTPS certificate, the system prompts an "incorrect parameter format" error.

Which of the following is NOT the reason of this error?

- A. The certificate contains strings like "---"
- B. The name of the certificate contains invalid letters
- C. The certificate contains nonstandard content
- D. The name of the certificate is too long to be accepted

Correct Answer: C

QUESTION 2

You applied for an SSL certificate through Alibaba Cloud's SSL Certificates Service. During the application, you selected "Manual" at the "CSR" step. You now want to install your certificate on a server running Apache.

What must you do?

- A. You must revoke your certificate and re-apply, this time choosing "Automatic" at the "CSR Generation" step. Otherwise, the SSL certificate cannot be downloaded
- B. You can download a crt file of type "Other" from the SSL Certificates Service console, then use openssl to convert this file to pfx format for use with Apache
- C. SSL Certificates Service doesn't support the type of certificates needed by Apache. They cannot be used together
- D. You can use the "generate pfx file" function built into the SSL Certificates Service to manually generate and download the pfx file needed by Apache

Correct Answer: D

QUESTION 3

Which of the following methods can be used to download the metric data of Alibaba Cloud CloudMonitor?

- A. Download the data through Open APIs
- B. You can download the data through both the console and Open APIs
- C. You can only view the reports, but cannot download them.
- D. Download the data from the console

Correct Answer: B

QUESTION 4

Alibaba Cloud Security's Data Risk Control can effectively resolve junk registration, database hacking, and other service risk identification problems. To use this service, you need to first collect service data. Which of the following methods can be used to collect information off Web application systems?

- A. JavaScript
- B. SDK
- C. JavaScript, SDK
- D. HTML5

Correct Answer: A

QUESTION 5

Alibaba Cloud WAF identifies attacks using human/robot detection, Big Data analysis, model analysis, and other related techniques. Which of the following CC attack defense modes does WAF provide to meet the protection requirements of users? (Number of correct answers 2)

- A. Threat
- B. Exception
- C. Attack emergency
- D. Normal

Correct Answer: CD
