QUESTION 2

After uploading a new document format to Alfresco Content Services, you notice that it isn't showing up in the full-text search results. Which action might help you understand why?

- A. Use Luke to check the index for the document UUID, then check the index state of that UUID.
- B. Look at the list of registered transformers to make sure the mime type of the uploaded document is transformable to text.
- C. Verify the content model to make sure it was properly loaded into the repository.
- D. Inspect the current upload script, we need to manually add the indexing for new mime types there.

Correct Answer: B

QUESTION 3

What does the CMIS object model not support?

- A. versioning
- B. workflow
- C. policy
- D. document

Correct Answer: B

QUESTION 4

What is the purpose of a content policy?

- A. To allow for model constraints, such as LIST or ENUM constraints.
- B. To initiate Java code in response to predefined events.
- C. To limit which user/group can create certain types of content.
- D. To validate content against a strict model XSD.

Correct Answer: B

QUESTION 5

What is the primary use of content rules?

- A. Set disposition schedules for content, as defined in Alfresco Content Services\' default retention policy.
- B. Restrict who can interact with content in a folder that has rules applied.
- C. Set rules on how content is used within Alfresco Content Services and its applications.
- D. Trigger an action in response to new or updated content in the repository.

Correct Answer: B
