**QUESTION 1**

A developer creates a custom workflow step, adds it to a workflow, and configures a workflow launcher to run it when a new asset is uploaded into the DAM.

After an asset was uploaded, the developer notices that the asset is always listed as Processing, and the workflow is still in a RUNNING state.

What could be the cause of this behavior?

- A. The workflow could not find a required background job in the system.
- B. The custom workflow step threw an exception during execution.
- C. The Handler Advance option was not checked in the workflow step.
- D. The Launcher was not configured for the folder the asset was uploaded to.

Correct Answer: A

QUESTION 2

A developer is using Create and Translate workflow with "Add to existing translation project" on assets with subassets.

Which action should be taken to handle subassets?

- A. Only use AEM Machine Translation, where it is the only method supported on Assets with subassets.
- B. Subassets mime types must be defined in Day CQ DAM Create Asset Servlet or else they will be ignored.
- C. Make sure subassets are selected before starting the workflow; otherwise, they will not be translated.
- D. Select and remove the subassets from the translation job to void any potential problems.

Correct Answer: D

QUESTION 3

A developer writes the following code to create a new asset:

```
import com.day.cq.dam.api.Asset;  
import com.day.cq.dam.api.AssetManager;  
  
AssetManager assetManager = resourceResolver.adaptTo(AssetManager.class);  
Asset asset = assetManager.createAsset(path, inputStream, mimeType, doSave);
```

If inputStream is null, what happens to the "createAsset" call?

- A. A null asset is returned without exceptions.
- B. A NullPointerException is thrown.
- C. An AssetException is thrown.
- D. A new asset is created without original rendition.

Correct Answer: B

QUESTION 4

A developer is attempting to remove a custom metadata profile that is currently assigned to a folder in the DAM. Which is a possible outcome of this action?

- A. All existing metadata values will be removed from the assets.

- B. All metadata values that were inherited from the previous profile will be removed.
- C. The metadata values of the assets will persist even after removing the metadata profile.
- D. The current metadata profile can only be replaced with another metadata profile.

Correct Answer: D

QUESTION 5

A user would like to create watermarked renditions of some assets in AEM Assets. Which of the following would you recommend as a workflow strategy that best achieves this goal?

- A. Implement a new workflow process to generate a watermarked rendition of an asset. Create a new workflow model that includes this process, and run this workflow on the desired assets.
- B. Modify the DAM Update Asset workflow model to include the Add Watermark process.
- C. Implement a new workflow process to generate a watermarked rendition of an asset. Modify the DAM Update Asset workflow model to include this workflow process.
- D. Create a new workflow model that includes the Add Watermark process, and run this workflow on the desired assets.

Correct Answer: B
