QUESTION 1

A developer creates the following code snippet to implement a simple polling importer to fetch stock prices from an external source:

```
JAVA
package com.adobe.training.core.core;
...
@Component(immediate=true,
enabled=true,
service = Importer.class,
property = {
    Importer.SCHEME_PROPERTY + "=stock"
})
public class StockDataImporter implements Importer {
    private final Logger logger = LoggerFactory.getLogger(getClass());
    private final String SOURCE_URL = "https:// query.mystocks.com/v7/finance/quote?symbols=";
    private static final String LASTTRADE = "lastTrade";
    @Reference
    private SlingRepository repo;
    @Override
    public void importData(final String scheme, final String datasource, final Resource resource)
        throws ImportException {
        try {
            ParseJson parseJson = new ParseJson();
            String lastTrade = parseJson.loadJson(SOURCE_URL+datasource);
            writeToRepository(datasource, lastTrade, resource);
        }
        catch(Exception e) {
            logger.error("Exceprion" e);
        }
    }
    private void writeToRepository(final String stockSymbol, final String lastTrade, final Resource resource) throws
RepositoryExceprion {
        Session session= repo.loginService(null, repo.getDefaultWorkspace());
        Node parent = resource.adaptTo(Node.class);
        Node stockPageNode = JcrUtil.createPath(parent.getPath() + "/" + stockSymbol, "cq:Page",
            session);
        Node lastTradeNode = JcrUtil.createPath(stockPageNode.getPath() + "/lastTrade", "nt:unstructured",
            session);
        lastTradeNode.setProperty(LASTTRADE, lastTrade);
        session.save();
        session.logout();
    }
}
```

The polling importer needs to fetch stock prices for a specific stock symbol and needs to be triggered every 5 minutes.

Which node structure should the developer create in CRX to make sure that the code shown is executed successfully?

- A.
- ```
+/apps/system/config/com.adobe.training.core.core.StockDataImporter [sling:0
sgiConfig]
 -SCHEME_PROPERTY: "stock"
 -source: "ADBE"
 -target: "/content"
 -interval: 5
```
- B.
- ```
+/apps/system/config/com.adobe.training.core.core.StockDataImporter [sling:0
sgiConfig]
  -sling:resourceType: com.adobe.training.core.core.StockDataImporter
  -SCHEME_PROPERTY: "ADBE"
  -target: "/content"
  -interval: 5
```
- C.
- ```
+/etc/importers/polling/stock
 -jcr:mixinTypes: ["cq:PollConfig"]
 -source: "stock:ADBE"
 -interval: 300
 -target: "/content"
```
- D.
- ```
+/etc/importers/polling/stock
  -sling:resourceType: com.adobe.training.core.core.StockDataImporter
  -stock: "ADBE"
  -interval: 300
  -target: "/content"
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: A

QUESTION 2

An online insurance company website has user-generated content that must be replicated in all publish instances.

What action should the developer take to achieve this?

- A. Configure the dispatcher flush agent in publish instance.
- B. Configure reverse replication agents for the author.
- C. Configure the replication agent in the publish instances.
- D. Disable static agent in the author instance.

Correct Answer: A

Reference: <https://helpx.adobe.com/fi/experience-manager/6-4/sites/deploying/using/replication.html>

QUESTION 3

A developer is working on the following Sling Model that is being used in a component.

```
java
@Model(adaptables = SlingHttpServletRequest.class, defaultInjectionStrategy = DefaultInjectionStrategy.OPTIONAL)
public class SampleModel {
    @Inject
    private Page currentPage;
    private boolean matchingTitle;
    @PostConstruct
    private void init() {
        matchingTitle = title.equals(currentPage.getName());
    }
    public boolean isMatchingTitle(){
        return matchingTitle;
    }
}
```

The model must check if the configured value of the jcr:title property for the component matches the name of the current page. If the jcr:title property of the component has NOT been configured, then isMatchingTitle() must return false.

How should the developer inject the title property in this model?

A.

```
@ValueMapValue
@Via("jcr:title")
@Required
private String title;
```

B.

```
@ValueMapValue
@Via("jcr:title")
@Default(values = "")
private String title;
```

C.

```
@ValueMapValue
@Named("jcr:title")
@Required
private String title;
```

D.

```
@ValueMapValue
@Named("jcr:title")
@Default(values = "")
private String title;
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Correct Answer: C

QUESTION 4

A developer is installing a content package with the package manager. The developer needs to restrict the approximate number of nodes in a batch that is saved to persistent storage in one transaction.

How should the developer modify the number of transient nodes to be triggered until automatic saving?

- A. AEM instances automatically modify the number of transient nodes based on the load balancing.
- B. Modify the export package manifest header and copy the content package to AEM installation folder.
- C. Select the option MergePreserve for the Access Control Handling drop-down in the Install Package dialog-box.
- D. Change the value of Save Threshold in the Install Package dialog-box.

Correct Answer: C

QUESTION 5

In which two ways can a developer keep simple and maintainable CRX Access Control Lists? (Choose two.)

- A. Delete the `everyone` group.
- B. Use Deny statements sparingly.
- C. Assign access rights to user groups rather than users.
- D. Assign access rights user by user.
- E. Use Deny statements extensively.

Correct Answer: CD
