QUESTION 2

A customer wants to improve efficiencies with their content creation processes for website optimization. Specifically, the customer wants to use content created in AEM inside of Adobe Target.

Which AEM feature should be used to meet the requirements?

A. Content Fragments

B. Teaser Component

C. Experience Fragments

D. Adobe Target Mbox

Correct Answer: C

QUESTION 3

The customer wants to have an ecommerce website with several sites pages with the following criteria:

AEM servers and the ecommerce platform are hosted and managed on different domains Timing constraints and ecommerce product evolution require that the cart and the products pages be delivered directly from ecommerce platform and not by AEM Part of the page is written using a SPA framework

What should the Architect do to mitigate Cross Origin Resource Sharing?

A. Use Server Side Include on AEM pages to display ecommerce data

B. Use OSGI services to make calls to the ecommerce platform

C. Use Ajax calls to make calls to the ecommerce platform

D. Use proxy server to separate traffic for AEM and ecommerce platforms

Correct Answer: B

QUESTION 4

A client is in the discovery process for building a React native app, which is a single codebase that runs natively on iOS and Android. The goal is to reduce development costs. The client wants to reduce content creation costs in the new react Native app by reusing as much of the marketing content already published in their AEM instance.

What should the Architect recommend to meet this requirement?

A. Content Fragments

B. Sling Resource Resolution

C. Experience Fragments

D. OSGi Bundles

Correct Answer: A

QUESTION 5

The home page of an ecommerce site displays properly on the Author instance. The same page on the Publish instance is rendered with missing styles and fonts. It is confirmed that all necessary components,

templates, client libraries, and user permissions have been replicated. What should the Architect do to resolve the issue?

A. Use dependencies property

B. Use categories property

C. Use allowProxy property

D. Use embed property

Correct Answer: A
