### QUESTION 1

An Architect is creating an index to optimize data retrieval from AEM. The Architect implements a Property index instead of a Lucene index.

What is an advantage of the Property index?

- A. Property indexes support uniqueness constraints
- B. Lucene indexes are supported after AEM version 6.3
- C. Property indexes are faster than Lucene indexes
- D. Property indexes offer more features than Lucene indexes

Correct Answer: A

---

### QUESTION 2

A client needs to roll back published pages to a previous version in instances where content errors were uncovered. Previous versions of every published page should be made available for the authors to roll back if needed.

Which solution should an Architect recommend?

- A. Create editable template to autosave page versioning
- B. Modify the Page Activation workflow to include a versioning step
- C. Restore individual page versions from the AEM backup file
- D. Update the dispatcher.any file to force versioning of all pages

Correct Answer: B

---

### QUESTION 3

Which format can content services export to out of the box (OOTB)?

- A. CSV
- B. HTML
- C. TEXT
- D. JSON

Correct Answer: D

---

---

#### QUESTION 4

A client wants to implement AEM so that all US customers experience the same page load performance. The client only has a single datacenter in Texas. Which implementation strategy should the Architect recommend?

- A. Additional AEM Dispatchers in the Texas datacenter
- B. Adaptive Design in
- C. Responsive Design
- D. Content Delivery Network

Correct Answer: D

---

#### QUESTION 5

A client's site does not show the latest page content for some site visitors. The client has two data centers with each configured with a Dispatcher connected to two Publish machines. The site load issue only occurs intermittently for visitors from one of the data centers.

Which step should the Architect take to resolve the issue?

- A. Review the log files on the Author instances to determine if there are any template errors
- B. Check the Publish instance(s) attached to the Dispatcher associated to the impacted data center
- C. Disable caching on all impacted data centers Dispatchers to force the Publish machines to serve the page content
- D. Check the SSL certificate on the impacted data center's load balancer.

Correct Answer: B
