QUESTION 1

A customer maintains user accounts in an external database and wants to authenticate AEM users using the users stored in the database.

What should the Architect create?

- A. A custom authentication handler and external identity provider
- B. A customer authentication filter and a user sync handler
- C. A customer authentication filter and an external identity provider
- D. A customer authentication handler and an authentication filter

Correct Answer: D

QUESTION 2

Which two security aspects should be configured in a dispatcher.any? (Choose two.)

- A. SQL Injection
- B. Cross Site Request Forgery (CSRF)
- C. Clickjacking
- D. Cross Site Scripting (XSS)
- E. Denial of Service (DoS)

Correct Answer: BE

QUESTION 3

A site needs to be protected against Cross-Site Request Forgery (CSRF). Which configuration should the Architect review?

- A. Apache Sling Script Cache
- B. Apache Sling Redirect Servlet
- C. Apache Sling POST Servlet
- D. Apache Sling Referrer Filter

Correct Answer: C

QUESTION 4

A customer with an international website has authors all over the world who work on content. Each day, a high amount of content changes are done through page editing, workflows, and translations.

Performance of the AEM Author starts off fine but degrades over time. Monitoring shows the available disk space is steadily decreasing. A health check shows that the daily maintenance jobs did not finish.

What two actions should the Architect do to resolve the issue? (Choose two.)

- A. Run version and workflow purging
- B. Recommend running offline Tar compaction
- C. Recommend running online Tar compaction
- D. Extend the daily window for online revision cleanup
- E. Increase the allocated memory to AEM

Correct Answer: CE

QUESTION 5

An author makes changes to a page and performs replication to a publish site. Adobe Launch is used to add Analytics tags to the page. The old version of the page still appears on the dispatcher.

The Architect cleared the local browser and dispatcher cache. Also, replication queue has been verified and there are no pending replication jobs.

Which two steps should be performed to resolve this issue? (Choose two.)

- A. Check that the stat files are not missing on the dispatcher
- B. Check that permissions are appropriate for the resources
- C. Check that dependent components and templates are available on Publish
- D. Check that the replication agents are configured
- E. Check that the launch libraries have been published

Correct Answer: BE
