**QUESTION 1**

A large retail customer is building their ecommerce platform on AEM. Several third-party vendors sell products through their site. Those vendors need to review and verify the content close to production before the content goes live and the customer wants to provide them a restricted environment.

Which approach should the Architect recommend?

- A. Give third-party vendors access to the Author Server
- B. Use the Preview Capabilities of AEM Author Server
- C. Export content as PDF and share with the vendors
- D. Add a Publish (preview) Server and provide access

Correct Answer: D

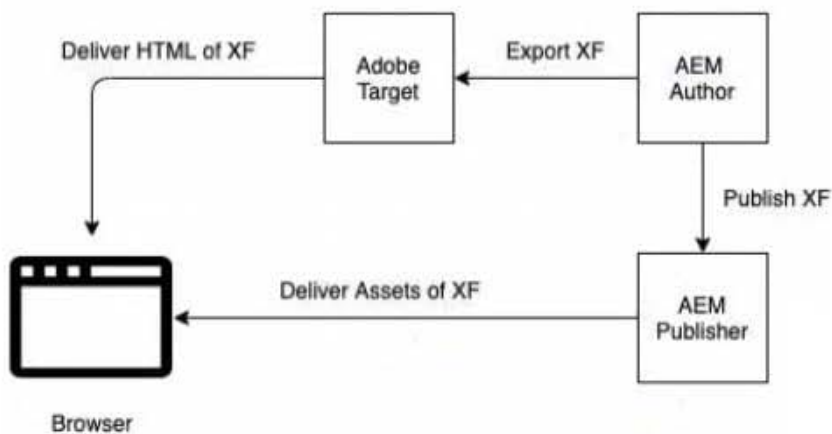

QUESTION 2

A financial sector client is using AEM 6.5 on premise. The creative team needs to create the content for the various marketing campaigns that are scheduled. The client wants to use Experience Fragments (XF) to accelerate content creation for marketing purposes.

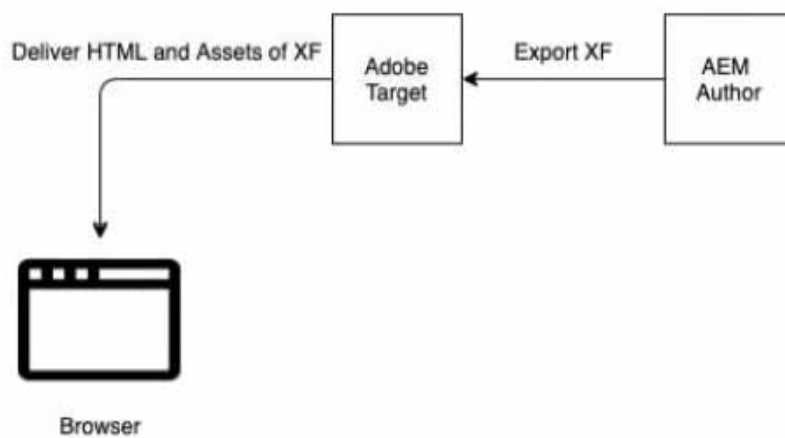

Which Data flow diagram should an Architect use to communicate requirements to the client network team?

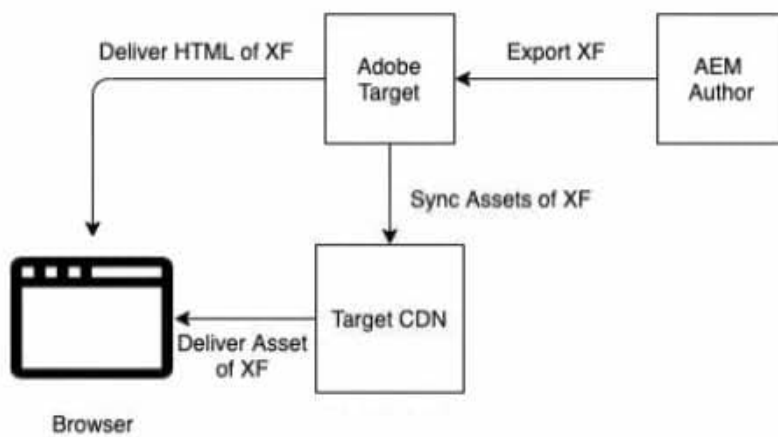

A.

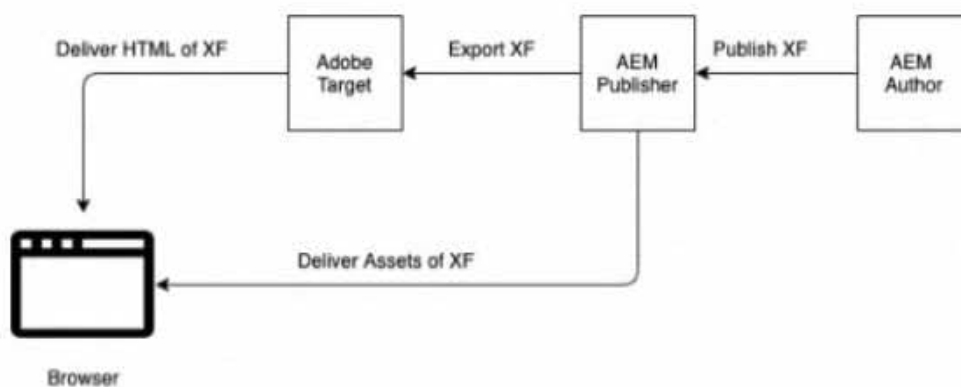

B.

C.

D.

- A. OptionA
- B. OptionB
- C. OptionC
- D. OptionD

Correct Answer: C

QUESTION 3

A large AEM enterprise site is implementing authentication and requires a true optimal load balancing across the site's multi AEM publish instances. Which approach should an Architect take to meet this requirement?

- A. Configure Sticky Connections
- B. Configure the Dispatcher to run with a Dedicated System User
- C. Enable Encapsulated Token Option
- D. Enable Round Robin processing in Dispatcher configuration

Correct Answer: D

QUESTION 4

AEM as a cloud service introduces major changes in the architecture by using containers. Which key architectural change was necessary to allow this to occur?

- A. Using Adobe 10 for asset ingestion and processing, storing it on a separate blob and providing AEM with metadata
- B. Using sling content distribution as the replication mechanism
- C. Using MongoDB for Author environment
- D. Isolating /app and /libs from the content, configurations and state mgmt.

Correct Answer: D

QUESTION 5

A customer is about to go live with a new website on AEM on prem. The DNS (www.domam.com) already points to the load balancer of the AEM environment and final sanity checks are being performed. The website was tested in lower environments without SSL. On production, the website is served over https. During sanity testing, all requests result in a 404.

While investigating this issue, an Architect determines the following:

1.

The requests land on port 443 on the load balancer where SSL is terminated and an HTTP header X-Forwarded-Proto is set

2.

The website Sling Mapping is created beneath /etc/map/http/www.domain.com.80

3.

The URLs on the website are externalized with http in the absolute links Which two actions should the Architect take to resolve this problem? (Choose two.)

A. Ensure the Sling Mapping exist at /etc/map/https/www.domain.com.80

B. Ensure the Sling Mapping exist at /etc/map/httpj)mwp
