### QUESTION 1

An existing AEM sites platform will receive the latest service pack. The service pack includes functional and non-functional fixes such as security patches. Which action should the Architect take to make sure the update is successful?

- A. Advise the customer to request Adobe to install the fixes directly on production since they are prechecked.
- B. Install the service pack in staging and ensure that all the bundles are up and running, then deploy to production.
- C. Identify the packages affected by the service pack after installing them into production and monitor them.
- D. Do a full staging of the service pack including a regression test, if passed, deploy to production.

Correct Answer: C

---

### QUESTION 2

A large AEM enterprise site is implementing authentication and requires a true optimal load balancing across the site's multi AEM publish instances. Which approach should an Architect take to meet this requirement?

- A. Configure Sticky Connections
- B. Configure the Dispatcher to run with a Dedicated System User
- C. Enable Encapsulated Token Option
- D. Enable Round Robin processing in Dispatcher configuration

Correct Answer: D

---

### QUESTION 3

A client's marketing pages are generally slow to load which is causing a significant drop in sales. All other AEM pages load within expected performance guidelines regardless of whether the visitor is being served the desktop or mobile experiences.

The marketing pages typically get slower when multiple external campaigns such as Facebook and AdWords drive traffic to those pages. The page performance tends to dip during high traffic periods. Internal campaign clicks such as those from hero images use similar campaign codes as external campaign traffic.

What should the Architect do to resolve this issue?

- A. Modify the dispatcher.any file's section to ignore campaign-based URL parameters
- B. Set AEM to use GZIP compression instead of the web server's compression
- C. Add a new dispatcher farm to assist with the client's marketing pages
- D. Convert the marketing pages to a responsive design instead of an adaptive design

---

Correct Answer: D

---

#### QUESTION 4

During development the AEM Publisher server keeps crashing randomly. The deployment included a new static FAQ component that was used in the websites Contact Us page. An Architect investigates to find the root cause for the random failures, and notices the following parameters:

1.

The server slows down when requests are sent to the Contact us page

2.

The number of requests to the page were very few

3.

Heap dump shows a large number of instances of the FAQ component

What is likely causing this issue?

A. The page was not cached in the Dispatcher.

B. The component triggers a traversal query.

C. The JVM garbage collection is not running.

D. The component has a cyclic dependency to itself

Correct Answer: D

---

#### QUESTION 5

A client recently purchased the Smart Content Service and is considering using the Enhanced Smart Tagging feature. As part of the process, the client recently created a new tagging taxonomy that has not been applied to any assets yet. An Architect needs to demonstrate the feature on a subset of the client's assets before using on all assets.

How should the Architect proceed?

A. Add sample assets to a new folder, tag assets in folder, then enable Smart Tagging via the folder properties

B. Add sample assets to a new folder, tag assets in folder, then run the Smart Tags Training workflow

C. Enable Smart Tagging via the folder properties for a single folder of assets, then run the Smart Tags Training workflow

D. Enable Smart Tagging via the folder properties for a single folder of assets

Correct Answer: C
