QUESTION 1

You are building a new module to add extra functionality to the Magento application. What files are required?

- A. registration.php
- B. etc/module.xml
- C. composer.json
- D. Setup/InstallSchema.php
- E. etc/config.xml

Correct Answer: ABC

QUESTION 2

You are reviewing a Magento module and see a directory named Service.

What can you determine from this directory's name?

- A. It is where the API response cache is stored
- B. It is where API-related configuration resides
- C. It is where the module's service contracts are stored
- D. You need to review the files in this folder to understand its purpose

Correct Answer: D

QUESTION 3

You are building a report using complex SQL aggregations to locate the required data.

In what type of class do you put these SQL statements?

- A. Resource model
- B. Repository
- C. Model
- D. Helper

Correct Answer: A

QUESTION 4

A merchant is interested in setting different prices for the same products in different store scopes.

What do you reply to this inquiry?

- A. The prices can only be scoped per website or globally
- B. The prices can be scoped per store
- C. The price scope can be set to store but this will lead to performance degradation of category pages
- D. The prices do not support scopes

Correct Answer: A

QUESTION 5

You have created a new product type, sample, and need to customize how it renders on the shopping cart page. Keeping maintainability in mind, how do you add a new renderer?

- A. Create the layout file, checkout_cart_item_renderers.xml, reference the checkout.cart.item.renderers block and add a new block with an as="sample" attribute.
- B. Override the cart/form.phtml template and add logic for the sample product type.
- C. Create the layout file, checkout_cart_index.xml, and reference the checkout.cart.renderers block and add a block with the as="sample" attribute.
- D. Create the layout file, checkout_cart_index.xml, and update the cart page's uiComponent to appropriately render the sample product type.

Correct Answer: A
