### QUESTION 1

Cloud Kicks (CK) has a field called Shoe Type Preference. CK's product team wants to see a report that groups specific picklist values together into the one of two lists.

What functionality should the administrator use to fulfill the team's request?

- A. PREVGROUPVALUE
- B. Summary Formula
- C. Bucket field
- D. Matrix Report

Correct Answer: C

---

### QUESTION 2

Cloud Kicks has two record-triggered flows on the same object. One flow creates a child record when criteria are met. The second record-triggered flow is based on criteria to check if the child record exists and updates a field. The field on the child record that needs to be updated is still null after the second record trigger.

What should the administrator do to resolve this issue?

- A. Make a new record-triggered flow on the child object to update the field on the parent record.
- B. Have the record-triggered flows fire on create or edit to update the field.
- C. Combine the two flows into one with checks to see which part of the flow needs to be run.
- D. flows into schedule flows and have them update the field.

Correct Answer: C

---

### QUESTION 3

An administrator recently implemented multi-factor authentication (MFA) with a standard security level selected. They are receiving cases that users are unable to log in.

What should the administrator do to troubleshoot?

- A. Check the session security level required at login on the user profile.
- B. Change MFA to High Assurance.
- C. Reset the user passwords and ask them to try again.
- D. Temporarily disable MFA.

Correct Answer: A

---

---

#### QUESTION 4

When an Opportunity reaches a certain value new fields need to be displayed to collect more "high profile" information. How can this be automated inside of Salesforce?

- A. Create a page layout, record type and workflow rule with a field update.
- B. Create a page layout and workflow rule with a field update
- C. Create a page layout, record type and Apex trigger
- D. Create a page layout and Apex Trigger

Correct Answer: A

---

#### QUESTION 5

Your organization's VP of Sales wants to automatically add the account name to an opportunity name once a record is saved. How can this be done?

- A. Use an Apex Trigger
- B. Enforce an opportunity naming guideline for Sales Reps
- C. Create a Workflow Rule with an immediate workflow trigger to update the opportunity name field using concatenate
- D. Use validation to update the field

Correct Answer: C
