QUESTION 2

A consultant is working with a credit card company that needs help with ongoing fraudulent transactions. The company provides a representative sample dataset for the consultant to analyze in Einstein Discovery. The story's initial assessment shows that a third-party payment app is the source of these fraudulent transactions. However, the company rejects this assessment outcome, stating they have not had a partnership with this payment app long enough for it to be a concern.

What is the recommended next step to improve the story outcome?

- A. Make adjustments to the story to better demonstrate that the third-party payment app is the culprit.
- B. Use the credit card company's domain knowledge and exclude the third-party payment app from the story.
- C. Explain to the company that the story has returned unbiased results and the initial assessment is accurate.
- D. Ask the credit card company for a more comprehensive dataset to analyze.
