### QUESTION 1

A filter is used in a power supply to \_\_\_\_\_.

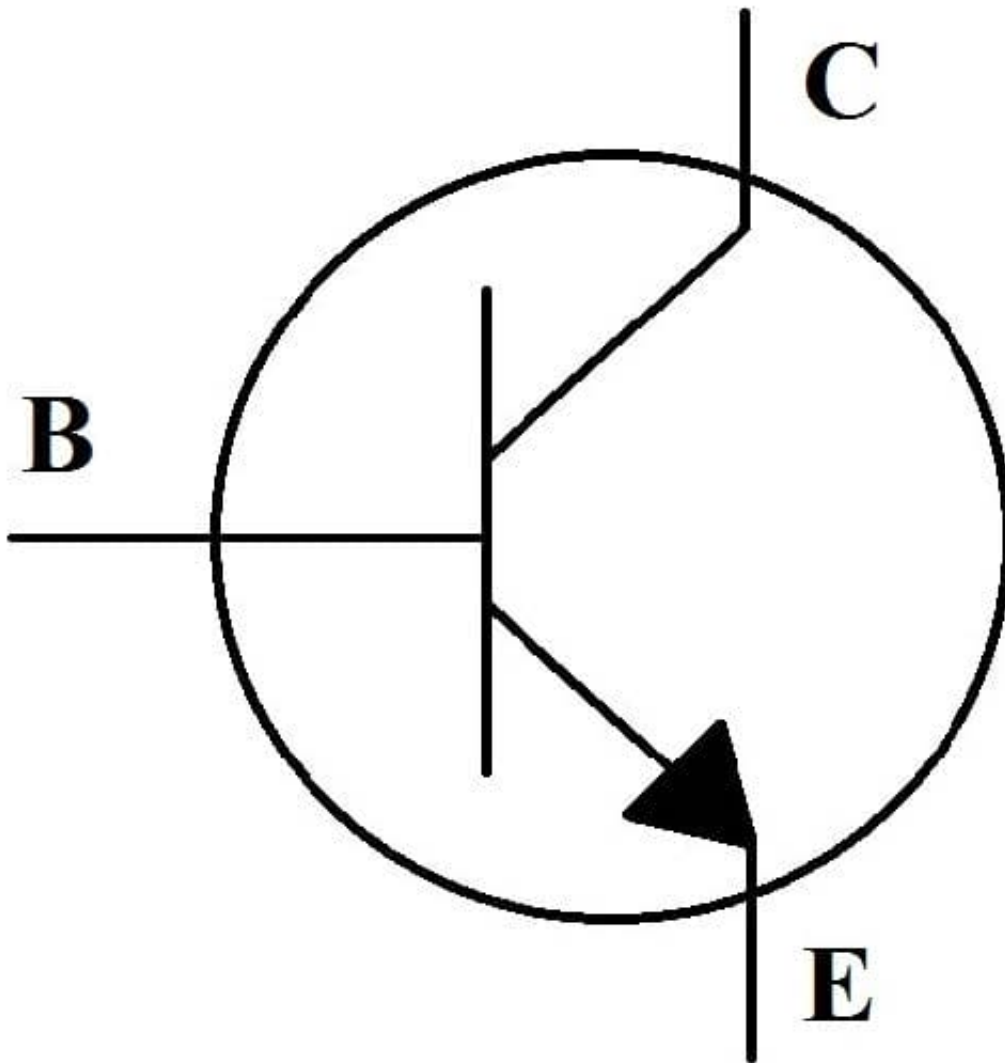

- A. convert alternating current to direct current.
- B. change direct current to alternating current.
- C. even out voltage variations.
- D. smooth out power surges.

Correct Answer: C

A filter is placed in the power supply to even out any voltage variations. In some cases, a choke may be used in the filter to smooth out the current variations.

---

### QUESTION 2
