Correct Answer: C

QUESTION 3

After the presentation, you are asked to explain the chart. Assume you have applied a full risk-based testing strategy.

Which of the following answers would you expect to best describe the pie chart?

K4 3 credits

A. All the risk items have been covered with tests. No more risk items remain to test

B. According to the full risk-based testing strategy applied, it is very likely that the highest- risk items, tests and bugs remain in the blue and red areas. Therefore, it is very risky to release the application

C. Only the lowest-risk items, tests and bugs should remain in the blue and red areas. Therefore the application can be released at any time subject to management of the items identified in those areas

D. 97 percent of the risk items has been tested. No open bugs or test failures remain. Only 3 percent of risk items remains to be covered by the remaining test

Correct Answer: C

QUESTION 4

Your test team consists of four members (Mary, Bob, Mark, Dave) with different interpersonal skills.

Correct Answer: A

QUESTION 5

You are the Test Manager on a project following an iterative life-cycle model. The project should consist of nine iterations of one month duration each. It is planned to develop the most important features to have a stable core of the application in the first three iterations and to add the additional features in the last six iterations. At the beginning of the first iteration, only a draft version of the requirements specification document for the core features is available. Assume that during each of the first three iterations, the chosen features are fully completed and unit tested.

Which of the following statements is true in this context?

K4 3 credits

A. The system test phase should start when all the requirements are frozen

B. You should allocate a large effort for system testing during the first three iterations

C. You should allocate all the effort for the system test phase only in the last iteration

D. You should apply the same test strategy as used in a sequential life cycle model

Correct Answer: B
