### QUESTION 1

#### DRAG DROP

You have an Azure subscription that contains an Azure file share.

You have an on-premises server named Server1 that runs Windows Server 2016.

You plan to set up Azure File Sync between Server1 and the Azure file share.

You need to prepare the subscription for the planned Azure File Sync.

Which two actions should you perform in the Azure subscription? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Actions	Answer Area
Create a Storage Sync Service	First action: <input type="text"/>
Create a sync group	Second action: <input type="text"/>
Install the Azure File Sync agent	
Run Server Registration	

Correct Answer:

Actions	Answer Area
<input type="text"/>	
Create a sync group	First action: Create a Storage Sync Service
<input type="text"/>	Second action: Install the Azure File Sync agent
Run Server Registration	

#### Step 1: Create a Storage Sync Service

The deployment of Azure File Sync starts with placing a Storage Sync Service resource into a resource group of your selected subscription.

#### Step 2: Install the Azure File Sync agent

The Azure File Sync agent is a downloadable package that enables Windows Server to be synced with an Azure file share.

When the Azure File Sync agent installation is finished, the Server Registration UI automatically opens. You must have a Storage Sync Service before registering.

#### (Step 3: Run Server Registration)

Registering your Windows Server with a Storage Sync Service establishes a trust relationship between your server (or cluster) and the Storage Sync Service. A server can only be registered to one Storage Sync Service and can sync with other servers and Azure file shares associated with the same Storage Sync Service. )

## QUESTION 2

You have an Azure subscription named Subscription1 that has the following providers registered:

Authorization

Automation

Resources

Compute

KeyVault

Network

Storage

Billing

Web

Subscription1 contains an Azure virtual machine named VM1 that has the following configurations:

Private IP address: 10.0.0.4 (dynamic)

Network security group (NSG): NSG1

Public IP address: None

Availability set: AVSet

Subnet: 10.0.0.0/24

Managed disks: No

Location: East US

You need to record all the successful and failed connection attempts to VM1.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Register the Microsoft.Insights resource provider
- B. Add an Azure Network Watcher connection monitor
- C. Register the Microsoft.LogAnalytics provider
- D. Enable Azure Network Watcher in the East US Azure region
- E. Create an Azure Storage account
- F. Enable Azure Network Watcher flow logs

Correct Answer: CDE

---

### QUESTION 3

Your company has an Azure subscription named Subscription1.

The company also has two on-premises servers named Server1 and Server2 that run Windows Server 2016. Server1 is configured as a DNS server that has a primary DNS zone named adatum.com. Adatum.com contains 1,000 DNS

records.

You manage Server1 and Subscription1 from Server2. Server2 has the following tools installed:

The DNS Manager console

Azure PowerShell

Azure CLI 2.0

You need to move the adatum.com zone to Subscription1. The solution must minimize administrative effort.

What should you use?

A.

Azure PowerShell

B.

Azure CLI

C.

the Azure portal

D.

the DNS Manager console

Correct Answer: B

Azure DNS supports importing and exporting zone files by using the Azure command-line interface (CLI). Zone file import is not currently supported via Azure PowerShell or the Azure portal. References: <https://docs.microsoft.com/en-us/azure/dns/dns-import-export>

---

#### QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure subscription named Subscription1. Subscription1 contains a resource group named RG1. RG1 contains resources that were deployed by using templates.

You need to view the date and time when the resources were created in RG1.

Solution: From the Subscriptions blade, you select the subscription, and then click Resource providers.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

#### QUESTION 5

You plan to migrate an on-premises Hyper-V environment to Azure by using Azure Site Recovery. The Hyper-V environment is managed by using Microsoft System Center Virtual Machine Manager (VMM). The Hyper-V environment contains the virtual machines in the following table.

Name	Operating system (OS)	OS disk size	BitLocker Drive Encryption (BitLocker) enabled on OS disks	Generation
DC1	Windows Server 2016	500 GB	No	2
FS1	Ubuntu 16.04 LTS	200 GB	No	2
CA1	Windows Server 2012 R2	1 TB	Yes	1
SQL1	Windows Server 2016	200 GB	No	2

Which virtual machine can be migrated by using Azure Site Recovery?

A. DC1

B. FS1

C. CA1

D. SQL1

Correct Answer: D
