QUESTION 1

HOTSPOT

You have a Windows Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

Name	Requirement
Pool1	<ul style="list-style-type: none">• Will be directly assigned to users in the graphics department at your company• Will run heavy graphic rendering and compute-intensive applications• Must support premium storage
Pool2	<ul style="list-style-type: none">• Pooled virtual machines for approximately 10 users• Will run Microsoft Office 365 apps• Will require calling and meeting features in Microsoft Teams• Must support premium storage

You need to recommend the virtual machine size for each host pool. The solution must minimize costs.

Which size should you recommend for each pool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Pool1:

Pool2:

Correct Answer:

Answer Area

Pool1:

Av2-series
Dsv4-series
NVv3-series

Pool2:

Av2-series
Dsv4-series
NVv3-series

Reference: <https://docs.microsoft.com/en-us/azure/virtual-machines/sizes> <https://docs.microsoft.com/en-us/azure/virtual-machines/nvv3-series> <https://docs.microsoft.com/en-us/azure/virtual-machines/dv4-dsv4-series>

QUESTION 2

DRAG DROP

You have an Azure Virtual Desktop host pool named Pool1.

You need to ensure that you can create an Azure NetApp Files volume that will host user profiles for Pool1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Select and Place:

Actions

Answer Area

Register the NetApp
Resource Provider.

Create an Azure NetApp
Files account.

Create an Azure File Sync
Storage Sync Service.

Register for Azure NetApp
Files.

Create a capacity pool.

Create a file share.

Correct Answer:

Actions

Create an Azure File Sync Storage Sync Service.

Create a file share.

Answer Area

Register the NetApp Resource Provider.

Register for Azure NetApp Files.

Create an Azure NetApp Files account.

Create a capacity pool.

Reference: <https://docs.microsoft.com/en-us/azure/azure-netapp-files/azure-netapp-files-quickstart-set-up-account-create-volumes?tabs=azure-portal>

QUESTION 3

You need to configure the device redirection settings. The solution must meet the technical requirements. Where should you configure the settings?

- A. Workspace1
- B. MontrealUsers
- C. Group1
- D. Pool1

Correct Answer: D

QUESTION 4

You have an Azure Virtual Desktop deployment that contains an Azure compute gallery. The Azure compute gallery contains an image definition named Definitions Definition1 contains the following image versions:

1.
1.0.0
2.
1.1.0
3.
1.2.0

You need to ensure that when a virtual machine is created from the Azure compute gallery, the 1.1.0 image version is used by default.

What should you do?

- A. Select Exclude from latest for image version 1.0.0.
- B. Select Exclude from latest for image version 1.2.0. Most Voted
- C. Apply a lock to image version 1.1.0.
- D. Apply a tag named default to image version 1.1.0.

Correct Answer: B

Exclude from latest. You can keep a version from being used as the latest image version. <https://learn.microsoft.com/en-us/azure/virtual-machines/shared-image-galleries?tabs=azure-cli>

QUESTION 5

You have a Windows Virtual Desktop host pool named Pool1 and an Azure Storage account named Storage1. Storage1 stores FSLogix profile containers in a share folder named share1.

You create a new group named Group1. You provide Group1 with permission to sign in to Pool1.

You need to ensure that the members of Group1 can store the FSLogix profile containers in share1. The solution must use the principle of least privilege.

Which two privileges should you assign to Group1? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. the Storage Blob Data Contributor role for storage1
- B. the List folder / read data NTFS permissions for share1
- C. the Modify NTFS permissions for share1

D. the Storage File Data SMB Share Reader role for storage1

E. the Storage File Data SMB Share Elevated Contributor role for storage1

F. the Storage File Data SMB Share Contributor role for storage1

Correct Answer: CF

Ref: <https://learn.microsoft.com/en-us/azure/virtual-desktop/fslogix-profile-container-configure-azure-files-active-directory?tabs=add>

Assign RBAC role to users

Users needing to store profiles in the file share will need permission to access it. To do this, you'll need to assign each user the Storage File Data SMB Share Contributor role

Then set NTFS permissions for example ((M) is for Modify):

```
icacls y: /grant "avdusers@contoso.com:(M)"
```

```
icacls y: /grant "Creator Owner:(OI)(CI)(IO)(M)"
```
