### QUESTION 1

#### HOTSPOT

Your network contains an on-premises Active Directory domain named contoso.com that syncs to an Azure Active Directory (Azure AD) tenant.

You have an Azure subscription that contains an Azure Virtual Desktop host pool.

You create an Azure Storage account named storage1.

You need to use FSLogix profile containers in storage1 to store user profiles for a group named Group1. The solution must use the principle of least privilege.

What should you include in the solution? To answer, select the appropriate options in the answer area.

Hot Area:

#### Answer Area

For storage1:

Join to the contoso.com domain.
Configure a shared access signature (SAS).
Enable encryption by using customer-managed keys.
Configure Azure Active Directory Domain Services (AD DS) integration.

To Group1, assign the role of:

Storage Blob Data Contributor
Storage Blob Data Reader
Storage File Data SMB Share Contributor
Storage File Data SMB Share Reader

Correct Answer:

#### Answer Area

For storage1:

Join to the contoso.com domain.
Configure a shared access signature (SAS).
Enable encryption by using customer-managed keys.
Configure Azure Active Directory Domain Services (AD DS) integration.

To Group1, assign the role of:

Storage Blob Data Contributor
Storage Blob Data Reader
Storage File Data SMB Share Contributor
Storage File Data SMB Share Reader

## QUESTION 2

You deploy multiple Windows Virtual Desktop session hosts that have only private IP addresses.

You need to ensure that administrators can initiate an RDP session to the session hosts by using the Azure portal.

What should you implement?

- A. Remote Desktop Connection Broker (RD Connection Broker)
- B. Azure Application Gateway
- C. Azure Bastion
- D. Remote Desktop Session Host (RD Session Host)

Correct Answer: C

Azure Bastion is a new fully platform-managed PaaS service you provision inside your virtual network. It provides secure and seamless RDP/SSH connectivity to your VMs directly in the Azure portal over SSL. When you connect via Azure Bastion, your virtual machines do not need a public IP address.

## QUESTION 3

### HOTSPOT

You are planning the deployment of Pool4.

What will be the maximum number of users that can connect to Pool4, and how many session hosts are needed to support five concurrent user sessions? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

Number of users that can connect to Pool4:

	▼
5	
7	
15	
35	
70	

Number of session hosts to support five concurrent user sessions:

	▼
1	
2	
3	
4	
5	

Correct Answer:

### Answer Area

Number of users that can connect to Pool4:

	▼
5	
7	
15	
35	
70	

Number of session hosts to support five concurrent user sessions:

	▼
1	
2	
3	
4	
5	

#### QUESTION 4

Your company has a main office and two branch offices. Each office connects directly to the internet. The router in each branch office is configured as an endpoint for the following VPNs:

1.  
A VPN connection to the main office
2.  
A site-to-site VPN to Azure

The routers in each branch office have the Quality of Service (QoS) rules shown in the following table.

Name	Destination	Available bandwidth allocated
Rule1	VPN traffic to the main office	25%
Rule2	Site-to-site VPN traffic to Azure	25%
Rule3	HTTP/HTTPS traffic to all Azure and Microsoft 365 public IP addresses	25%
Rule4	Traffic to non-Microsoft internet addresses	25%

Users in the branch office report slow responses and connection errors when they attempt to connect to Windows Virtual Desktop resources.

You need to modify the QoS rules on the branch office routers to improve Windows Virtual Desktop performance.

For which rule should you increase the bandwidth allocation?

- A. Rule2
- B. Rule3
- C. Rule4
- D. Rule1

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/azure/virtual-desktop/rdp-quality-of-service-qos>

#### QUESTION 5

##### HOTSPOT

You plan to deploy two Azure file shares named Share1 and Share2 that will be used with Azure Virtual Desktop. Share1 will contain at least 100 GB of data and must be stored on SSDs. Share2 must be able to switch between Transaction

optimized and Cool storage tiers and must be stored on HDDs.

You need to recommend which type of storage accounts to use for the shares. The solution must minimize costs.

What should you recommend for each share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

## Answer Area

Share1:

	▼
Premium block blobs	
Premium file shares	
Premium page blobs	
Standard general-purpose v1	
Standard general-purpose v2	

Share2:

	▼
Premium block blobs	
Premium file shares	
Premium page blobs	
Standard general-purpose v1	
Standard general-purpose v2	

Correct Answer:

# Answer Area

Share1:

	▼
Premium block blobs	
Premium file shares	
Premium page blobs	
Standard general-purpose v1	
Standard general-purpose v2	

Share2:

	▼
Premium block blobs	
Premium file shares	
Premium page blobs	
Standard general-purpose v1	
Standard general-purpose v2
